

Frankfort Gas Station Owners Are Threatened

Capone gangsters are said to have sent threatening letters the past week to Miss Elizabeth McMullen who has been running a lunch stand in connection with a gas station at the four corners north of Frankfort. The forepart of January this station was held up and the attendant, John Schmook was shot and killed. A few weeks ago one of the bandits who had figured in the holdup came into the stand and bought a sandwich and was recognized by Miss McMullen. Just as he left the stand a county highway police man came into the stand and Miss McMullen told him what had happened. The officer found the man across the street at a garage having air put in his auto tires and arrested him. Later Miss McMullen identified the man at Joliet. Shortly afterward she received threatening letters and the past week it is understood she received three more threatening letters and it is understood that her father residing in Chicago also received threatening letters warning him to leave the city. The McMullins have rented their station to a Mr. Wilson who has been conducting a gas station in the McIntosh subdivision east of Frankfort. Just where the McMullins are going has not been disclosed.

Kin of Mokena Man Holdup Victims

Wm. Niethammer of St. Louis arrived in Mokena Friday from Evansville where he had been visiting with his brother Fred formerly of Mokena. While Mr. Niethammer was visiting with his brother, the latter's two sons who are operating a gas station nearby were held up by four bandits and after being robbed were struck on their heads with revolver butts by the robbers and quite badly hurt. The sheriff was called and arrived in 15 minutes. The search was taken up and the bandits, all young fellows were caught after holding up another gas station. The youths were identified and brought to trial. The ringleader was sentenced last week to ten years in the penitentiary at Michigan City.

Orland Auctioneer In Auto Accident

While Charles Erickson, auctioneer of Orland was turning off the Lincoln highway about two miles to the southwest of Mokena last Wednesday morning, a car driven by a Joliet man crashed into the rear of the former's car. Both cars were badly damaged. No one was hurt.

Why The News-Bulletin Is A Good Ad. Medium

The fact that advertising placed in The News-Bulletin brings good results is proven time and again. The latest instance is cited by George Koeller, Jr., one of the proprietors of the Mokena Motor Sales Garage. This firm ran an adv. in The News Bulletin three weeks ago on the new welding outfit they have installed and have had satisfactory responses. The past week welding jobs came in from Lockport township brought in by the adv. The wide circulation of The News-Bulletin is result producing.

The well known auctioneers of this section, Charles Erickson and Edward Schmaedeke both of Orland township, are boosters for News-Bulletin advertising, both saying that farm sales advertised in the News-Bulletin have been largely attended, and the big success of the community sales held in Orland township this spring are largely attributed to the advertising carried in this paper, which is the most widely read paper in this section.

The classified adv. column of this paper is a big result producer. If you have any thing to sell or rent try an adv. in this column and see how these little ads. work. And the cost is very small, only 1 cent per word per insertion, the smallest charge for an adv. being 25 cents.

This paper prints all the worth while news of six surrounding communities and circulates in practically every home. As a rule this paper is found in these homes for the whole week until the next edition comes. These insures reader interest and in some homes you can find copies of this paper from the first issue in August of 1919.

Subscribe for the News-Bulletin and keep posted on the affairs of your own and surrounding towns. This is the only community paper published in this section and the only paper which boosts home activities and home business.

New Lenox Election Is Unopposed

Ernest Oram was re-elected to the office of highway commissioner in New Lenox township with 262 votes at the town election Tuesday. Louis Eberhardt was elected school trustee with 230 votes. Both candidates were unopposed.

Wm. Lorenz, Mokena, Dies Suddenly

William Lorenz, well known Mokena resident, died suddenly at Silver Cross hospital, Joliet, early Friday morning. He was stricken a few days ago with a throat infection and when his condition became serious Thursday evening he was taken to the hospital.

He was born in Mokena and resided in this section nearly all his life. Surviving him beside his wife are two daughters, Edna and Mrs. Grace McKay of Joliet; five brothers, George of Tinley Park, Henry of Spencer, Ernest of Cedar Lake, Indiana, Herman of Joliet and Frank.

Two sisters, Mrs. William Penrose and Mrs. Philip Werner, both of Joliet. Funeral services will be held on Monday afternoon, the hour not having been set at time of going to press.

New Lenox School Sponsors Movies

The school board of New Lenox Grade School is sponsoring movies given every Thursday evening in the school auditorium. There is a very interesting and entertaining comedy followed by the feature picture. There is a small admission fee for adults and children.

Mokena Garden Club Wins Again

The Mokena Garden Club members were greatly pleased, especially those on the exhibit committee when they learned Saturday morning that they had captured three prize ribbons. The club had entered a formal dinner table setting which was very beautiful and drew much praise even if it did not claim a ribbon. The window box and outdoor planting representing Arizona plant life took second prize. It was very lovely and contained many fine cacti plants which were tastefully placed forming a garden. The magnificent angel wing begonia plant of Mrs. Nels Sorenson which was used in the sun room exhibit won the other prize, it being third. Mrs. Sorenson has many lovely plants.

The other ribbon claimed by Mokena was in the Junior exhibit being a sweet potato plant grown by Adeline Semmler who is a member of the Lilac Unit. Second prize was taken by this entry.

It is a very great effort and no amount of hard work for any committee having charge of an entry in this line of exhibition and there is much credit due the Mokena ladies who did the hard work to win a laurel for their club, but when prizes are received, it helps smooth down some of the tired nerves and to forget some of the hard work. Mokena has won each time they have entered the state competition Flower Show and when a ribbon is won there it means a great deal.

Mokena Candidate Receives Boost

Don C. Hall, Mokena's candidate for representative, is very active this week putting the finishing touch to the campaign. This week Mr. Hall has received the following fine letters regarding his candidacy, the first one coming unsolicited.

OFFICE OF PRAIRIE FARMER
Chicago, Illinois, April 5, 1932
Mr. Don C. Hall,
Mokena, Illinois.

Dear Mr. Hall:
Prairie Farmer published its recommendations for the legislature in the April 2nd issue. We have made it a practice to confine our recommendations to candidates who have already served in the Illinois legislature. I hope you will be successful in your district.

Sincerely yours,
W. FLOYD KEEPERS,
Managing Editor, Prairie Farmer

LEGISLATIVE VOTERS LEAGUE
Chicago, Illinois, April 6, 1932.

Hon. Don C. Hall,
Mokena, Illinois.

My Dear Mr. Hall:
We have received your inquiry of April 2nd as to why your candidacy for the House in the 41st District failed to receive the endorsement of the Legislative Voters League.

In reply will say inasmuch as three of the eleven Republican aspirants had served in the legislature with some degree of credit and a fourth of the candidates was known to us as having excellent qualifications, the League did not deem it advisable to name more than those four candidates in its comment. I am glad to say that our investigation has elicited nothing about you or your public record that is in any way detrimental.

Yours very truly,
S. M. SINGLETON,
Executive Secretary.

New Lenox P. T. A. Elect Officers

The Parent Teachers Association met in the school auditorium Friday night for its monthly business session. The meeting was presided over by the president Mrs. Lottie Lock-

Be Sure and Vote Tuesday

Next Tuesday is the big day, this being primary election day. A heavy vote is anticipated. Indications are that many Democratic votes will be cast.

In the Mokena precinct four Mokena candidates are seeking nomination. They are: for state representative, Don C. Hall; for precinct committeeman, Elmer L. Cooper and Wm. Semmler. These are all on the Republican ticket. On the Democratic ticket Christ Kohl is a candidate for precinct committeeman.

The many friends of Mr. Hall are going to give him three votes straight and are urging their friends to do likewise to give him a big majority in his home precinct. Mr. Hall is opposed to the present farcical prohibition law. He is for the repeal of the 18th amendment. He addressed voters meetings in New Lenox, at the Masonic temple in Joliet and a meeting in Braidwood on Friday evening and is actively engaged in the windup of the campaign this week.

Let us all help nominate Mr. Hall. Give him three votes straight.

Tinley R. N. A. Play April 12 and 13

The Tinley Park Royal Neighbors will present a play "Sophronia's Wedding" at the Community hall April 12 and 13. Everyone invited.

Tinley To Vote on Board of Education

For the first time in its history, Tinley Park is going to vote on a board of education instead of for school directors at the school election, to be held in Tinley Park this Saturday night. Following are the candidates to be voted on in school district No. 146: For President to serve one year, Bert H. Fulton. For seven members, to serve on Board of Education: Edward Henck, Jennie L. Klepper, John C. Funk, Wm. C. Rick, Walter Mager and Edward J. Mohr.

Orland Charity Supper Big Success

The supper held by the Orland Park Post No. 526 of The American Legion was a grand success and the members of the Post wish to heartily thank all who cooperated in making it a success. The exact report of the supper is as follows:

RECEIPTS
147 Adult tickets sold\$73.50
39 Children's tickets 9.75
Pies sold 2.85
Milk & cream sold60
Butter sold25
Lettuce sold25
Buns25

Total receipts \$87.45

List of groceries purchased:
Milk and cream; head lettuce; apple sauce; potatoes; peas; dressing; coffee; chipso; 82 lbs. ham; 5 lbs. cheese; 30 doz. rolls; 10 loaves bread; 40 pies; 10 lbs. butter; pickles; olives; mustard; sugar; paper napkins. Total \$44.72. Net proceeds \$42.73. An Orland Park Post check for \$42.73 was turned over to Andrew Ludwig, Treasurer of the Orland Relief Association. This money is to be used for the relief of needy families in Orland and immediate vicinity.

Harnack Wins In Green Garden

A hotly contested election for commissioner of highways was held in Green Garden township Tuesday John C. Harnack was elected highway commissioner on the Republican ticket with 192 votes, defeating Wm. H. Pauling on the People's ticket who polled 174 votes.

Adam J. Heisner, on the Republican ticket was unopposed for school trustee and received 220 votes.

Cappel Re-elected in Frankfort Township

In Frankfort township the town election was without opposition. Emil Cappel was re-elected highway commissioner on the People's ticket without opposition receiving 435 votes in the Mokena and Frankfort precincts and Lawrence T. Woodman was elected school trustee with a total of 297 votes on the Republican ticket.

New Lenox Child Saved From Drowning

The three year old son of Mr. and Mrs. Kenneth Thompson of Brookwood Park, narrowly escaped drowning Saturday morning when he fell into a water hole near his home. A neighbor, Mr. O'Roark, heard his cries and saved him.

The following officers were elected for the coming year: president, Mrs. Emma Roblin; vice-president, Mrs. Juliet Warner; secretary, Mrs. Aurelia Bruns; treasurer, Mrs. Flossie Corp.

NEW LENOX HOME DESTROYED IN \$10,000 FIRE

The residence of Albert Pfaff in New Lenox was destroyed by fire Tuesday evening.

Robert McCleary and Jackie Gougar were roller skating near the place about nine o'clock and noticed sparks on the roof. They ran down the street yelling fire. There was no one at home at the Pfaff dwelling and Mr. Pfaff was finally located in the Will Brown garage.

A bucket brigade was formed and the Joliet fire department was called, but the fire had too much of a start and there was lack of water. The fire which started in the attic is said to have been caused by defective wiring. The building was a brick bungalow and was built about six years. The loss is estimated at \$10,000 covered by insurance.

Most of the household and furniture on the ground floor was saved.

ANNOUNCEMENT
I have rented the tin repair shop of the late David Kolber in Mokena and am prepared to do all kinds of tinsmith work. I solicit the patronage of my old friends in this and adjoining communities. Quality work guaranteed at right prices.
WM. NIETHAMMER

Between You and Me

Miss shy south-sider why don't you come out in the open. This is Leap Year.

Triangle Tattle columnist please note. We think we deserve a dollar, (Ketch on).

Did you notice the new man on the married men's team, 6 by number, who used to be a politician, but has since taken to selling gas. Has inherited an "alderman", that should be reduced.

The coaches think themselves pretty classy by sporting new sweaters.

There seems to be quite a rivalry between the freckled faced lad and the scorekeeper over a certain young lady who goes by the name of "Harriet".

Say folks you know the little truck driver for I. N. R. Beatty is girl shy. This is Leap Year girls, and he has a Ford roadster with yellow wheels. (Here's your chance) Hot-cha.

Our Heavies have put in an order for Air cushioned benches for our players. One of our players reported being seriously burned and bruised by the ones we have now. That seems to be the only way he can get hurt at a basketball game.

We find that the "Triangle Tattle" made an error in one of his columns stating that this boy was a direct descendant of the great chief "Shoot The Bull". That statement is all wrong. The lad's great, great, great grandfather was chief "Sitting Bull". The lad seems to be keeping up the old family traditions, on being interviewed by one of our reporters. He proudly remarked, "It's in my blood. I yam what I yam that's all I yam."

M. Hennebry Calls On Mokena Voters

Michael F. Hennebry, Democratic candidate for State Representative in the General Assembly from this district, was a caller at the office of the News-Bulletin on Wednesday of this week. The editor was not at home, but takes this opportunity to acquaint the voters of this community and the readers of the News-Bulletin, that Mr. Hennebry has been an active worker in behalf of the people of Will County, and particularly this part of Will County in the interest of road extension and development, and has made many friends in his energetic efforts to aid the citizens of Mokena and vicinity in the matter of highway improvement of great interest to them.

He has been exceedingly active in the promotion of the Southwest Highway, and the editor of this paper has had the pleasure of seeing and hearing of his interest in this great improvement of this Highway so vital to the interests of the people of Eastern Will County.

Mr. Hennebry has been a member of the legislature for several years and is forceful in speech and commands a wide influence among the members of the legislature.

The Democratic voters at the primary on April 12th, can be of great service to their party by supporting him at the Primary on April 12th. I know that he will appreciate whatever support may be given for his re-nomination.

The Tinley Park Ladies chorus is busily engaged rehearsing for an operetta, "Tulip Time", which they plan to present Thursday and Friday nights May 19th and 20th in the Tinley Park school auditorium under the direction of Prof. Alexander Corado of Tinley Park.

Mrs. Wm. Funk has been named as the business manager of the operetta.

Mokena Section Foreman Leaves; Here 17 Years

Charles Olson who has been section foreman on the Rock Island railroad at Mokena for the past 17 years, has been transferred to Moss-ville, Illinois, located 10 miles east of Peoria. Mr. Olson left Wednesday night to take up his new job. The Mokena job is open for bid.

Mr. Olson will move his family to the new location in the next few days.

One Time Mokena Tinner Returns

Wm. Niethammer who has been staying in St. Louis with his daughter Ruth for sometime, has rented the tinsmith shop of the late David Kolber in Mokena and will go into business again right away. Mr. Niethammer formerly conducted a tinsmith shop and hardware store in Mokena in the old Zahn building which was destroyed by fire a few years ago.

Petition for Wolf Road Continuation

Much interest is being evinced in the continuation of the paving of Wolf Road north from 143rd street in Orland township and the past week Lloyd has been circulating a petition asking that this highway be paved from 143rd street to 123rd street in Palos.

Misinterprets Letter; Kills Self With Rifle

John Braasch, 62 years old, living on the Ridgewood farm, on 127th street near Harlem avenue, in Palos Park, received a letter Monday from a bank relating to interest payments on \$35,000 worth of bonds which he owned. Misinterpreting the letter to mean that the bonds were worthless, he went to a woodshed and killed himself with a rifle.

Former Tinley Woman Dies In Oak Forest

Mrs. Charles Stevens of Knox, Indiana, died in the Oak Forest Tuberculosis Sanitarium Monday afternoon after a brief illness.

Mrs. Stevens will be well remembered as formerly Clara Funk of Tinley Park, and was the daughter of the late Mr. and Mrs. Geo. Funk. She was born in Tinley Park and resided here until her marriage.

She is survived by her husband, eight children and one sister, Mrs. Herman Otjen, the later of Tinley Park. Funeral services were held Thursday afternoon in Knox, Ind.

Notice to Mokena Voters

I solicit your support of my candidacy for precinct committeeman on the Republican ticket at the primary election next Tuesday, April 12th. My name appears at the foot of the third column on the ballot. I will greatly appreciate your support

WM. SEMMLER

NOTICE

Our place of business in Mokena will remain closed during the funeral of Wm. Lorenz next Monday afternoon.

CAPPEL BROTHERS.

Mokena Garage Shoots It Out With Bandits

George Koeller, Jr., one of the proprietors of the Mokena Motor Sales garage shot it out with a bandit Saturday morning and was slightly wounded in the left side when a bullet from the bandit's gun grazed him.

Mr. Koeller was sleeping in a room next to the garage office and was awakened by his watch dog about 3:30 o'clock Saturday morning. Throwing a duster over his night clothes, and wrapping the dog in a blanket to keep him quiet, he grabbed his automatic revolver and opening the door into the office he was confronted by the bandit. He had the drop on the bandit and ordered him to throw up his hands. The bandit had forced the office door from the street side open and instead of complying with Mr. Koeller's command, he fled thru the partly open door and slammed it shut after him. Mr. Koeller fired several shots at the bandit thru the door. Then he opened the door to give chase and as he did so, the bandit who had been standing outside close to the door, pressed his gun close to Mr. Koeller, the bullet piercing the few clothes he had on and made a flesh wound.

The bandit then ran down Wolf road southward. Mr. Koeller tried to fire but his gun had jammed. After a second's delay he was able to fire four shots after the fleeing bandit. A few seconds later a sedan passed the garage going north on Wolf road at top speed. After a short interval another car went south at breakneck speed. It is thought the bandits were in this car. Mr. Koeller got a good look at the man he shot it out with. He said the bandit was a tall, skinny fellow with a rather prominent nose. Mr. Koeller went to the office of Dr. E. G. MacMahon for first aid treatment after the shooting. Sheriff Oliver Flint came out to Mokena shortly after being notified, but no trace of the bandits was found.

The Mokena Motor Sales garage has been burglarized several times within a year.

Orland P. T. A. Program April 14

The Orland Park P. T. A. will present the following program at their next meeting at the Orland Park school auditorium April 14: "Bells Of The Sea", Glee Club; Play, "Redbeard The Pirate", High School; Instrumental number, by Gladys Townsend, Ruth Kay, Irene Jackson, Gordon Kay and Jim Pomeroy. Pantomime, Ah! by Elizabeth Steffen, Earl Keisch and Leo Putz. Instrumental No. 2 by same pupils as first number. Popular song by the Glee Club.

The program is in the hands of the high school pupils. We would like to have the parents come as the students have planned and worked out this program. This is probably the last time some of these students will be able to entertain you at a P. T. A. meeting, as next year they will be attending a city high school.

The mothers chorus, that had planned a coming out in April will take place May 12. Mr. W. R. Hotfield retired principle of Parker, will be our guest speaker. We would like to have any one who has attended Parker High or the Chicago Normal, where Mr. Hatfield was a teacher, to come out. The speaker will try to give encouragement and

A paragraph with nothing to say can't get by, but a verse of four lines often does.

COMFORT for COLICKY BABIES ... THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made specially for babies and children. It is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs, no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

Cast H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

There will always be "incompatibility of temperament" where there is selfishness.

Now easy to get rid of Gray Keep Hair Naturally Dark

Now without using dangerous dyes you can darken gray hair naturally, quickly restore its original shade by the world's finest, safe way which is now keeping millions of heads young looking. Benefits the hair as it darkens it to the shade you want. As simple as brushing. Try it. Pay druggist 75c for a large bottle of WYETH'S SAGE & SULPHUR and just follow easy directions.

A first-class price doesn't always indicate a first-class hotel.

Rheumatic Pains Relieved this Quick Way

If stabbing pains shoot across your back and cripple you, rub on good old St. Jacobs Oil. Relief comes before you can count 601... Relief without burning or blistering. This famous oil simply draws out inflammation and pain. It is soothing, healing. For the aches and pains of Rheumatism, Neuritis, Lumbago, Neuralgia or Backache there's nothing so quick or sure to bring relief. Get a small bottle of St. Jacobs Oil from your druggist.

FLORSTON SHAMPOO - Ideal for use in connection with Parker's Hair Balm. Makes the hair soft and fluffy. 50 cents by mail or at druggists. Hiacox Chemical Works, Patchogue, N. Y.

STATE CAPITOL NEWS

Hiram L. Williamson, Secretary Illinois Franchise Association

The 1931-32 Illinois Blue Book, official state publication compiled by Secretary of State William J. Stratton, has been issued. It is profusely illustrated and contains 1,036 pages. The book is full of valuable data and departmental information. In addition, it contains a complete account of the re-dedication of Lincoln's tomb.

The department of public welfare is printing, under the direction of Mrs. George Thomas Palmer, state probation officer, a manual for probation officers in Illinois. It totals 140 pages and includes probation laws of the state as well as other useful information for probation officials and judges.

Dr. H. S. Pepon has been commissioned by the State of Illinois to compile descriptions and ecological notes on every kind of plant that grows in Illinois, from the smallest flower to the largest tree. This work not only requires many weeks of examining specimens owned by the several great herbaria in the Middle West, but also months of collecting in the field. All last summer, Doctor Pepon and his assistants were busy collecting, and this summer they will be at it again until he is satisfied that they have a specimen of every Illinois plant. When completed, the work will constitute the only thorough state flora in the Union.

The state archives division of the state library renders a real service to the people of the state as well as to the different state officials. Certified copies of all important records are issued by the department of origin and are filed in the state archives division. The system has been worked out so completely that these records are instantly available. Reference questions involving the use of the archives for other than strictly official purpose, particularly by historical students, are answered by a staff familiar with the history and development of departmental agencies and methods. This service relieves other state officers and departments from the interruption of their regular work to make research on those questions. The Illinois State Library is headed by Secretary of State William J. Stratton, and Miss Margaret C. Norton is superintendent of the archives department.

According to the Mississippi Valley association, ratification of Senate Bill No. 26 now pending in the special session of the general assembly, will provide without a cent of additional expense to the taxpayers, an ideally located joint rail-and-water public terminal in the heart of Chicago's industrial district for the use of the barge line services which will be inaugurated with the opening of the Illinois waterway next spring.

The board of directors of the Garden Clubs of Illinois has announced that the semi-annual meeting will be held in Springfield in October. This will be the first time for any of the semi-annual meetings to be held outside of Chicago. Representatives from the 112 clubs in the federation will attend.

According to the state department of public health, the record of disease prevention work in the rural schools of Grundy county is one of the best in the history of immunization work by county public health nurses. Mrs. Loretta Seavey, county nurse of Grundy county, says that all the pupils in 25 rural schools, a total of 475, have been vaccinated against smallpox.

An unusual display is now on exhibition in the fine arts gallery at the University of Illinois. It is made up of the fine American examples of book illustration, binding, and engraving as done by a modern printing establishment. The exhibit is being held under the auspices of the library school, of fine arts, and Gamma Theta Phi, professional journalism society.

According to an announcement of the state department of public welfare, Illinois state institutions were caring for 2,014 more inmates and pupils on February 1, this year than at that date in 1931. There were 44,292 being cared for in the penal, correctional, and charitable institutions at the first of last month.

According to a survey conducted by state and federal departments of agriculture, reserves of corn, wheat, and oats remaining on Illinois farms from the crops of 1931 are above average. Reserves are estimated at: Corn, 183,516,000 bushels; wheat, 12,171,000; oats, 58,297,000.

Officials of A Century of Progress, Chicago's 1933 World's fair, have announced that seven buildings have been wholly or almost wholly completed. Two highways have been built and the preliminary work has been done for a system of sewage, water and electricity and gas installations sufficient to serve a permanent city of approximately 100,000 inhabitants. Within the next few weeks or so, workmen will commence on the three and a half miles of fencing which will enclose the grounds of the exposition.

The following are candidates for state treasurer subject to the Republican primary, April 12: C. Wayland Brooks, Chicago; Howard J. Carr, Chicago; Ernest S. Hackett, Chicago; Mark Hannan, Chicago; William Kane, Chicago; Edward E. Miller, East St. Louis; David A. Russell, Chicago; William Walter Scott, Chicago.

The jury in Belvidere trying Albert W. Benham, amateur financier, on charges of operating a confidence game, was discharged after nearly 44 hours of deliberation. The jury took 34 ballots. The jurors were divided 6 to 6 on the first vote, but they stood 10 to 2 for acquittal on the final ballot.

The Illinois Nurserymen's association is co-operating in a splendid way in the proper observation of the George Washington Bi-Centennial. The association has had three talks on "Memorial Trees" prepared. The subjects are: "Outside the House Beautiful," for presentation before garden clubs, women's clubs, real estate boards, etc.; "Let's Plant a Tree," for presentation before schools; "A Matter of Good Taste," for presentation before service and luncheon clubs. Geo. R. Hemingway, Oak Park, is chairman of the tree planting committee.

Business Improvements.

Elston D. Herron, Shelbyville, a senior in the school of journalism at the University of Illinois, has been offered six jobs, with graduation still two months away. He has been invited to take up editorial work on papers in Chicago, Springfield, Fort Wayne, Detroit, St. Louis, and a southern Illinois city.

Fourteen car repairers have been called back to work on the Beardstown, Illinois division of the C, B. & Q. Railroad.

A bulk oil distributing plant to cost \$100,000 will be erected in Niles Center, Ill., by the Phillips Petroleum company. The structure will be completed by May 1, and fifteen or twenty people will be employed at the plant.

Officials of the Brown Shoe company factory at Mattoon, Ill., have announced that within the next two months the present capacity of the plant will be doubled and the weekly pay roll increased between \$9,000 and \$10,000. The change will make the regular force one ranging between 700 and 800 employees. Between 300 and 400 are now employed.

About 40 men have been employed by the James & Shinn Co., in the construction of the Kuehne factory at Mattoon, Ill.

The underwear factory at Salem, Ill., has resumed operations and about 100 women and girls will be given employment.

The International Shoe company at Anna is now employing 355 workers and turning out an average of 130 dozen shoes per day.

A crew of about 400 men are working on the St. Louis division of the Missouri Pacific between Chester and Clinton, Ill. The company contemplates much more work on its lines as soon as possible.

Gordon and Ellet Steen, of Wisconsin, opened the Kenney Cheese factory at Kenney, Ill., on February 15. Their first pay was on March 15 for the last half of February—the first two weeks of operation. The pay roll amounted to approximately \$1,200, which will be doubled for the second two weeks' period. The factory now has eleven truck routes, collecting milk from 232 customers.

Construction on the new post office at Carlinville, Ill., is ready to begin. As far as possible, local labor and materials will be used.

The B-G Garments company, Elgin, will increase its force to the extent of 40 or 50 experienced workers. There are now about 260 employees on the pay roll.

The Morrison (Ill.) refrigerator factory has been re-opened and officials of the plant hope to have it operating at full capacity within a short time.

A 47 per cent gain over January was registered in building projects during the month of February in Chicago suburbs.

The United Action Campaign for Employment reported that on March 14 the total of persons returned to work was 229,320. The Illinois total was 12,634.

Major operations in the building of the huge dam and sea wall for the Mississippi river 9-foot channel are now under way. About 60 laborers, all of them residents of Moline, Rock Island, and Davenport were given jobs. The project will ultimately employ a large number of men.

Pittsfield (Ill.) is to have a cheese factory. Fred Uhlend of Fountain, Wis., has rented a warehouse in that city and will install the machinery needed. The factory will be in operation within two or three weeks.

Lesson for April 10

HOW SIN BEGINS

LESSON TEXT—Genesis 2:15-17; 3:1-8. GOLDEN TEXT—Watch and pray, that ye enter not into temptation: the spirit indeed is willing, but the flesh is weak.

PRIMARY TOPIC—The Garden God Planted.

JUNIOR TOPIC—How Sin Started.

INTERMEDIATE AND SENIOR TOPIC—How to Overcome Temptation.

YOUNG PEOPLE AND ADULT TOPIC—Our Responsibility for Our Sins.

A look out upon the world proves that man is not what he should be. It is not reasonable to suppose that man is now what he was when he came from the hands of the Creator, much less an improvement. The only way of accounting for this is by the historic fall of man as given in the Bible.

1. Man's Probation (Gen. 2:15-17). 1. The place (v. 15). It was in the beautiful Garden of Eden. Man's environment was suited to his nature.

2. The necessity (v. 16). This grows out of man's constitution. Adam was created with the possibility of character, but not with character. Alternative choice makes character possible. Free will was what made Adam a real man.

3. The means (v. 17). It was most simple, just one prohibition. The tree of the knowledge of good and evil was forbidden. Alongside of this small restriction was placed a large privilege—the tree of life.

II. Man's Temptation (3:1-8).

1. The method (vv. 1-5). Satan, a personal, malicious being, appeared in the guise of a serpent. Notwithstanding the growing unpopularity of the doctrine, the fact remains that there is a personal devil. This is proven both by the Scriptures and experience. He did not appeal directly to the man. He chose to appeal to the woman through the serpent, and through the woman to the man.

a. He found the woman while alone.

b. He insinuated doubt into Eve's mind as to God's word and love. This is his method today. He tries to get people to doubt God's Word and then to doubt his goodness. He persuaded Eve that God was withholding from her something that was good. He today induces men to say that God is cruel, harsh, and unjust. He gets young people to think that father and mother are too exacting. As soon as one doubts God's word, he begins to criticize it and to disobey it.

c. To get Eve to doubt the penalty of sin. There is much flippant jesting about eternal punishment. Be it remembered, however, that this does not change its reality.

d. He appealed to innocent appetite. He argued that there would be no harm in eating, but great advantage.

e. Eve gazed upon that which God had forbidden and lusted after it.

2. The fall (vv. 6-8). The steps in the fall seem to have been rapid. From doubting God's love, Eve went to doubting his word. From gazing upon and lusting after that which God had prohibited, there was but a short step to indulgence. Eve not only disobeyed, but involved Adam in her sin.

III. Man's Judgment (vv. 9-24). God's holy nature is such that when men sin he at once manifests himself. God called Adam and Eve to account the same day.

1. A disturbed relationship with God (v. 8). The introduction of sin marred man's familiar intercourse with the Almighty. Adam and Eve not only hid from God's presence, but when summoned by him began to make excuse and Adam even laid the blame on God.

2. The degradation of the serpent (v. 14). He henceforth became the type of sin and Satan (Num. 21:9; John 3:14; Rev. 12:9).

3. The undying enmity between the seed of the woman and the seed of the serpent (v. 15). This bitter enmity has continued from that day to this.

4. The ultimate victory of the woman's seed (v. 15). Satan's seed has harassed the woman's seed through the centuries, but on the cross the final stroke was made which crushed his head (John 12:31; Heb. 2:14; I John 3:8). This is the first gleam of the glorious gospel of Christ.

5. The judgment upon the woman (v. 16). This relates primarily to her as a wife and mother.

6. Man's new relationship to the earth (vv. 17-19). The earth was cursed on his account.

7. Death (v. 19). This includes spiritual and physical death.

8. Expulsion from the garden (v. 24). When man's nature was changed by sin, out from the beautiful garden he must go.

RANDOM SAYINGS

Apparent need is not always real need. He is our best friend who helps our real need.

It is a higher exhibition of Christian manliness to be able to bear trouble than to get rid of it.

If you have something good to say to a man better look him up and say it now. He won't be able to read his tombstone when he's dead.

Try these rich, safe suds for whiter washes!

SAVE the clothes—save yourself—with the famous hard-water soap, Rinso! Its live, active suds loosen dirt. Clothes soak whiter than they can be scrubbed.

Even in hardest water, Rinso is all you need. No bar soaps, chips, powders, softeners.

The makers of 40 famous washing machines recommend Rinso for safety and for whiter clothes. Get the BIG household package. It's thrifty to use Rinso for dishes and all cleaning—a little gives such a lot of creamy, lasting suds.

The granulated hard-water soap for tub, washer and dishpan

MEMORIES OF OLD DE LANCEY HOUSE

Abode in Which Fenimore Cooper Won Bride.

An old house on the Boston post road on the outskirts of Mamaroneck, now reduced to a lowly filling station, was more than a century ago the scene of a memorable event. Here it was, on New Year's day, 1811, that James Peter De Lancey, grandson of Caleb Heathcote, first lord of Scarsdale, gave his daughter Susan in marriage to James (later Fenimore) Cooper, son of Judge William Cooper of Cooperstown.

Susan and the twenty-one-year-old bridegroom were married in mid-afternoon. When the nuptials were over the young couple calmly sat down to a quiet game of chess in the De Lancey drawing room. Later they set out for Cooperstown, a strange wedding journey on which to embark in the dead of winter. The roads were often deep with snow, the distance was great, and the trip undertaken in a gig drawn by two horses, tandem.

It is probable James Fenimore Cooper and his bride lived in the De Lancey house for a period; certainly they dwelt for some time in the neighborhood. Later they moved to Scarsdale, where on the Angevine farm Cooper built a house and there in wrote his first work, "Precaution."

Aside from its historical associations, the old house is well worth observation. It is an excellent example

of Colonial architecture. Although one corner has been cut away to accommodate gas pumps, and another walled with immodest plate glass to produce a showroom, the main entrance, upper story and attic remain intact.

Its walls, still a dingy white, are of clapboard and shakes. Its three-dormer windows are today as they were when first built. The graceful moldings of original doors, eaves and window frames continue to exhibit the craftsmanship of Revolutionary journeymen.

From the panel by the door protrudes the same brass pear of the bell-pull that signaled the arrival of wedding guests on that New Year's day years ago. Four sturdy brick chimneys push through the gray roof slates, eloquent of broad, hospitable hearths, about which guests lingered with old Peter, sipping a final tankard of his dark brew or pulling at a last long pipe of his acid twist while they traced by dead reckoning the progress of the newlyweds on their honeymoon journey across frosty country roads.

In 1811 the house did not stand where it does now. About the turn of the century it was moved from its semi-isolated hillside setting down to the corner of what is now Fenimore road.

Cooper bequeathed Westchester county a reputation for literary prowess. On the Tompkins road, where it crosses White Plains post road at Scarsdale, is erected a tablet to the memory of his "Spy."—New York Times.

FRANKFORT

Adam Heisner of Green Garden suffered a stroke in the home of Mrs. Mark Thursday morning. He is seriously ill. Mrs. Mark is a sister of Mr. Heisner.

Mr. and Mrs. Charles Pfeifer attended the funeral of Mrs. Pfeifer's uncle, Lawrence Schweser, held in Mokena last Friday afternoon.

The Frankfort public school election will be held in the school auditorium Saturday night, April 9 for the purpose of electing one school director.

Shirley Mae Pfeifer who has been ill for the past 2 months is improving.

Grandma Baumann who was hurt in a fall sometime ago, is improving.

Lena Bankow who has been ill for several weeks remains about the same.

Mrs. Peter Folkers returned home from the Silver Cross hospital where she was for medical treatment.

The Frankfort public school will give an entertainment April 15 at the school auditorium.

A large number of basketball fans attended the games held in Tinley Park Thursday and Friday nights and also on Sunday afternoon at the Tinley Park school gym.

Mrs. Otto Burmeister of Chicago is caring for her father, Adam Heisner who is ill.

Mr. and Mrs. John Knight have as their guest this week, their daughter Ruth of Chicago.

Mr. and Mrs. Frye and son Arnold of Plainfield were guests in the home of Mr. and Mrs. Knight last Sunday.

Charles Rahm has been ill with the flu the past week.

Mr. and Mrs. Edward Fuss of Joliet spent Sunday with Mr. and Mrs. Frank Cheney.

MOKENA BOY SCOUT NEWS

Wherever you go in the United States—whether in Maine or Texas, Washington or Florida—you find Scouts everywhere, in city, town or open country. Scout troops dot every corner of the nation. Scouts are clean-cut, alert, spick and span in their uniforms and honored because of their service. As Theodore Roosevelt said:

"The Boy Scout Movement is distinctly an asset to our country for the development of efficiency, virility and good citizenship."

In the first sixteen years of scouting beginning in 1910, over three million boys became members.

Scouts are met in 57 civilized countries, which countries represent 91 per cent of the world's population.

Scouting is a great world brotherhood of boys and men, and, as a President of the United States has stated, is one of the big forces today making for world peace.

The boys in and around Mokena are invited to join the Mokena troop of Boy Scouts.

THIS PAPER. TRY IT!

His FARM TELEPHONE
Pays for Itself... PLUS

A farmer, living a few miles from Moline, Illinois, operates a fruit and vegetable farm, the products of which he markets from house to house in the city. He has found in the past, when he arrived in town with his produce, that he did not have certain items, or did not have them in sufficient quantity. To save time and increase sales he now telephones certain of his regular customers before beginning his route. The result has been a five per cent increase in sales, or, more than six times his monthly telephone bill! A farmer's telephone not only is economical... it's very profitable... and necessary.

Roby Speedway

Will Open May 8

The new Roby-Chicago Speedway will open the Central States "big league" auto racing season Sunday, May 8, it was announced this week by B. Ward Beam, operator of the mile oval.

Getting into action three weeks before the famous 500 mile classic is presented on the historic Indianapolis speedway, Roby will offer many favorites of this year's "500." It is anticipated that many big names of the Hoosier event will bring their Indianapolis mounts to Roby's opening for a final test in the hope of uncovering last-minute flaws in their high priced motors.

Leaders of competition on the west coast are also preparing to "pull stakes" for the eastern campaign will arrive here in time for the local premier.

A new speedway, offering national prominence thru new records possible on the Roby circuit, will attract many of America's headline jockeys.

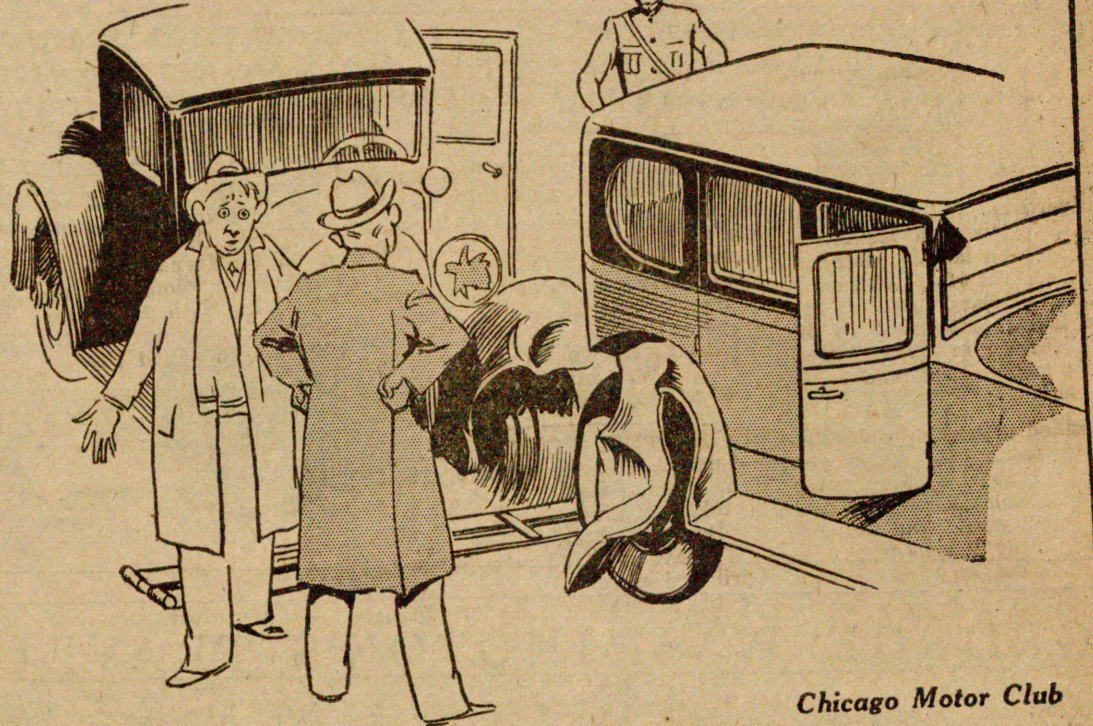

The Roby Speedway, according to Beam's announcement, will be rebuilt completely before the opening. The running surface of the mile oval will be torn up and a new top laid, making the oval the finest in the Central States. New fences, new and larger grandstands and general improvements will begin at the first break in the weather.

Roby's re-construction plans place it in the spotlight as one of the most likely tracks in the east to take the newly acquired American dirt track records from the Oakland, California speedway. Veterans of the auto racing sport predict faster competition at Roby this year than ever seen here before.

Four races are carded during 1932. At least one will be a championship event offering points toward the national speed crown. All Roby races will be operated under sanction of the Contest Board of the American Automobile Association, the governing body of big time auto racing in this country.

Will Co. Council of
Religious Education
Prepare for Meet

The Will County Council of Religious Education held a special meeting Sunday afternoon April 3rd at the First Presbyterian church in Joliet. Dr. Munroe of Chicago, who has been appointed as County Advisor for the International Council of Religious Education was present. Rev. Mr. Hall of Crete opened the meeting with prayer. The president Tom Patterson presided. The secretary's report was heard and the Treasurer's report was read and accepted. Wallace Oleson, advisory vice president of Crete reported that a teacher's training school on "The Life and Letters of Paul" will open this week in Steger.

The matter of sending delegates to the State convention at DeKalb May 25, 26 and 27 was discussed. Thirty-five delegates have been set as the goal from this county.

Rev. Van Zandt gave a report on the recent Young People's and Leaders conference held February 22 in the First Baptist church, Joliet. Dr. Munroe and Dr. Hayward, both representatives from the Inter-

national Council were the principal speakers. Much interest was shown to make this an annual event. Mrs. Otto Hill of Joliet was appointed Vacation and Week Day Supt., to fill the vacancy caused by the resignation of Miss Dorothy Zinser. Letters from T. A. Tripp, the state worker were read. Dr. Munroe gave a short talk on "Religious Survey."

It was decided to hold the annual convention October 1 and 2 in the Salem Evangelical church in Wheatland township.

The next County Officers meeting will be held Sunday afternoon May 22. It is expected Dr. Munroe will be present at this time.

NEW LENOX

Mr. and Mrs. A. W. Walsh were dinner guests in the home of Mr. and Mrs. Joseph Walsh in Joliet, Sunday.

Mr. and Mrs. Fred Haven and the latter's sister, Miss Lehlia Bower, the homes of Miss Harriett Francis and Mr. and Mrs. George Woodcock.

Mrs. Lynn Warner, president of the New Lenox Women's Club acted on the nominating committee for the Will County Club League which met in the Terminal building in Joliet, Tuesday.

The school of district 123 of which Miss Alma Thornberg is the teacher, was visited by the Illinois state school inspector last week. The school was reported as having 110 per cent in work required, efficiency in routine work, equipment and methods used.

The Golden Rule Camp of Royal Neighbors sponsored a card and bunco party in Urech hall Tuesday night. Prizes in pinocle were awarded to Josephine Sayers, Vera Osmus, Irene Schroeder, William Sayers, Ray Osmus and Fred Stettler. Winners in euchre were Octavia Pugh, Ella Button, Irene Marshall,

Frank Marshall, Ray Moore and Kinney Hilton. Audrey and Wanda Osmus, Manning Donnelly and Wallace Simmers won prizes in bunco.

Refreshments were served at the close of the games with Josephine Sayers in charge.

Miss Dolores Walsh entertained friends in her home Tuesday evening. The evening was spent informally.

The Ladies Aid Society sponsored the sending of 45 dozens of eggs from the M. E. church and Sunday school to the Methodist Old Peoples Home in Chicago. The eggs were sent as an Easter gift.

Perry McClure, who spent the week end with his mother Mrs. Elsa McClure, has returned to his work in Champaign.

Mr. and Mrs. George Duso and family who have lived on the Edith Francis place for several years, have moved to Joliet.

Mr. and Mrs. Bert Brown, and Mrs. Albert Pfaff and Mr. and Mrs. Wm. Brown attended a dinner given Sunday evening in the home of Mr. and Mrs. August Woeltje, in Joliet in honor of their daughter, Izetta, who was confirmed on Easter Sunday in St. John's English Lutheran church.

Mr. and Mrs. Louis Damman and Mr. and Mrs. Chris Runge of Joliet were guests in the home of

Mr. and Mrs. A. W. Paulsen, Sunday.

Mrs. Sophia Brueggemann of Chicago Heights, spent Thursday and Friday in the home of her daughter and son-in-law Mr. and Mrs. H. A. Fink.

Mr. G. F. Krog, cashier of the New Lenox State Bank returned to his work Monday after spending several weeks in Ute, Iowa, where he was called by the serious illness of his father, Rev. C. Krog. The condition of his father is still serious.

The P. T. A. will meet for its next regular business session on Friday night, May 6th in the school auditorium.

The New Lenox Relief Organization sponsored a pancake and sausage supper Friday night in the M. E. church dining room for the benefit of the unemployed of the township. Candidates of both the Republican and Democratic parties seeking nomination at the coming primary were present. After the supper, Richard Barr, Jr., and Billy Barr, showed movies taken in Europe and "See America First" taken by Richard Barr, Jr., last summer while on a trip thru the west with friends.

Pictures of local interest were also shown. Mrs. Dorothy Osmus, her parents, Mr. and Mrs. Sidney Batson and Mrs. Katherine Batson returned home Friday night from Clar

ion Iowa where they attended the funeral of their cousin Frank Pester which was held last Thursday. Enroute home they were the guests of Mr. and Mrs. Herman Stettler, former residents of New Lenox.

For Sale—Pedigreed police dog. For further information call New Lenox 20.

Mrs. Donald Schlegel of St. Louis has been a guest in the home of Mr. and Mrs. Amos Bruns the past week. She was formerly Lucille Muff of Matteson.

New Lenox Lutheran Church
Rev. Paul E. Schauer

You are invited to attend the Sunday services which are conducted Sunday afternoon at 2:00 o'clock in the Grace Episcopal church by the Rev. Paul E. Schauer. All services are conducted in the English language.

The Rev. Mr. Schauer will preach on Jesus, the Good Shepherd, who giveth His life for the sheep. Jesus wants to be everybody's Good Shepherd. Is He yours, my good friend? Will you not accept Jesus as your Savior and Good Shepherd today? He is waiting with open arms. Come! The Sunday school meets at 1:00 o'clock. The lesson Sunday is the story of Jesus raising the daughter of Jairus. Send your child to the Sunday School. All are welcome!

TINLEY PARK

JUNIOR GARDEN CLUB
by Josephine Gerco

The regular meeting of the Junior Garden club was held at the school at 1:15 p. m. on April 2nd. Our president, Fern Fulton presided.

The Garden Buds received prizes for the best scrap books. Fern Fulton received first in class one. Shirley Anderson was first in class two. Marguerite Lorenz was second in class two. She was awarded a blue ribbon. Marion Andres was first in class three. Betty Henderson was second and she received a blue ribbon. Velma Lorenz was first in class four.

Thurselda Lucius was awarded a prize for the most outstanding book on birds. These prizes will be rose bushes.

We were pleased to have our instructor Mrs. Florence Anderson with us too. Our study was opened by Mrs. Rogers telling us how to plan and plant our gardens. All the Garden Buds are requested to plant a flower garden.

The Junior Garden Buds will have a surprise for the school. Watch the paper for further news. Delicious cakes were served to the buds and these were brought by Doris Miller, Arnetta Mancke, Marie Bettenhausen and Catherine Hirsch.

Catherine Hirsch thanked the club for letters and a plant she received during her recent illness. We were pleased to have Catherine with us again. Garden Buds received some candy; Auntie Larkspur passed this out to the Buds.

Jennie Miknis was welcomed into the club. Meeting adjourned.

WOMAN'S CLUB NEWS

At the District Federation of Womens Clubs meeting Monday the 28th held in the Baptist church in Beverly Hills when over 300 women gathered for their annual meeting, two women from Tinley Park were honored by outstanding accomplishments. Mrs. Ella Schoeneck, teacher in the Fort Dearborn school was introduced, also her pupil Miss Wilma Wright who earned an award in the Art Contest for an etching of the chapel at the University of Chicago. This picture will be on display at the state convention held in the Sherman hotel in May and entered in the state wide contest. Another winning award was given Mrs. Wallace B. Combs for her district song: "Rejoice."

Born to Mr. and Mrs. Andy Dull on April 2nd, a baby girl.

LEST WE FORGET!!

Florence Wheeler, Publicity chr.

The American Legion Aux. Unit will hold their business meeting at the Community Hall on Friday April 8 at 8 o'clock. All those eligible and who wish to join, please attend.

ROYAL NEIGHBOR JUVENILES

Our next meeting is an open meeting to ALL Royal Neighbors and their CHILDREN.

Come and bring the children out and we will try and show you a pleasant afternoon. We'll be looking for you to be present Saturday, April 9 1:30 at community hall.

Henry Wilkie who has been ill and confined to bed for nine months is worse.

Howard Mager and Dick Swisher made a worth while trip thru the woods last week for their zoology class. They gathered 20 frogs and a fine specimen of a tree frog.

The last social meeting of the Niagatri Girls' Club was held at the home of Leona Simons. There was a large attendance in spite of the bad weather. Bunco was the diversion. Prizes were awarded. All members are busy doing their own needle and fancy work to be offered at future bunco parties as prizes. The proceeds from the bunco parties will be used to purchase their Illinois charter with.

Jack Swisher of Lowell, Indiana surprised his parents with an unexpected visit over the week end.

Mrs. Louise Mager who was injured in a recent fall, is able to be about again.

The Tinley Park Bakery is doing such a good business that another delivery truck has been added. The new truck will be in charge of Adolph Kaiser and will be in service next week. This truck will supply Matteson and the territory north of Tinley Park.

Miss Marie Bettenhausen celebrated her fifteenth birthday Sunday. Those present were: Helen Sippel, Gladys Holstein, Margaret and Bernard Andres, Mabel and Robert Breitbarth, Rose, Carl and Emil Bormet, Mr. and Mrs. Fred Breitbarth and children Donald and Dorothy.

TRINITY LUTHERAN CHURCH

Oak Park Ave. & 159th Street
Wm. Greve, Pastor

English services are to be conducted next Sunday at 10 o'clock a. m. Sermon on the Gospel lesson for the second Sunday after Easter. John 10, 11-16: "Christ Our Good Shepherd." All are welcome.

The Ladies Aid meets next Thursday April 14 at 2 o'clock. The Young Peoples Society will present the play "Attorney for the Defense" at the Tinley Park School Auditorium on Friday, April 22nd. The orchestra of Chicago Heights has been engaged to render several musical selections.

A CHALLENGE TO
YOUNG PEOPLE

During the past 40 years tens of thousands of young men and women of many nationalities and denominations have sought free training for Christian Service at home or abroad offered by the Moody Bible Institute of Chicago. More than 2,000 students enrolled in its day and evening schools last year. While for certain special courses a high school background is required, and college training desirable, yet grammar school training will admit to its general course. English is taught to any deficient in its use.

The Bible ranks first in all Institute courses, but instruction is furnished in such subjects as Sunday School Administration, Daily Vacation Bible School, Gospel Music, Public Speaking, Home Economics, Hygiene and Manual Training. In special courses are offered Theology, Homiletics, Church History, Apologetics, Hebrew, Yiddish, Greek and medical subjects for foreign mission work.

There are three terms a year, fall, winter and summer, but students may enter at any time. An illustrated catalogue will be mailed on request. Address, 153 Institute Place, Chicago Avenue Station, Chicago.

Good Printing Pays

LAWYER

SOLDIER

PATRIOT

LEADER

Oscar E. Carlstrom

Let Carlstrom the Soldier of '98
and '17 carry on in '33

Next Tuesday April 12th, the voters will go to the polls to select a Governor to pilot the State of Illinois through a crisis in our history. Which one of the men seeking the Republican nomination will best serve the common people of Will County if elected Governor?

Will the interest of the farmers, our laboring men and our home town merchant be served best at Springfield by Omer N. Custer, Banker and Public Utility Magnate, a man placed in the race by Governor Emmerson, who is afraid to come before the people with his four years record of inaction?

Will the interest of our common people be served best by the Kankakee Banker, Len Small who, so definitely retired by the people in 1928 after his notorious 'King Len' reign?

Is Banker Wm. H. Malone of Park Ridge, who so seriously muddled the taxes of Cook County, the man to in-

trust with this great office?

Or is Oscar E. Carlstrom son of emigrant parents; born and reared on a farm; self educated through diligent effort; soldier of '98 and '17 the most logical choice to 'carry on' the battle for the great masses of the people?

Oscar E. Carlstrom established a record of economy as Attorney General. While appropriations for all state governmental purposes increased 505 per cent in 14 years, the expenditures of Carlstrom's office increased 9 per cent despite greatly increased duty.

Carlstrom calls for a new deal! He pledges support for economy in government, re-apportionment representation, state liquor control, taxation reforms, safeguarded banking, protection for local merchants through a license tax on chain stores, and a full time pardon and parole board to eliminate the causes of prison riots.

Let's Nominate

Oscar E. Carlstrom
For Governor, April 12

"We Can Win With Carlstrom"

ORLAND PARK

The annual school election will be held this coming Saturday.

The town election held Tuesday was a very quiet affair, only one candidate, John C. Habenicht, for school trustee was on the ticket. He received 36 votes.

Mrs. H. Adele Cooper attended the flower show in Chicago Thursday.

Howard Beagley returned home last Tuesday from Silver Cross hospital, Joliet where he was taken after being hurt in an accident a few weeks ago. He is improving nicely.

The new Ford coupe is now on display in the Schussler Motor Sales showroom and is drawing much comment of praise. It certainly is a dandy car and is said to be the best ever built by Ford.

Postmaster J. F. Schmadeke, Roy Loeb, M. Strand and George E. Gee were called to the police court in connection with the hearing of a man held on charges of being implicated in the recent attempted hold-up of the Orland bank. The hearing was Monday.

The Euclid Golf Club expects to have their grounds open for the season by April 15th.

Politics have been rather quiet, but there is much sentiment for Len Small for governor on account of the warm spot he has in the hearts of many Orland people due to his favoring this section with important paved roads during his administration as governor.

A move is on foot to circulate a petition for a three year high school for Orland Park. There are said to be enough pupils here for a third year high.

Mrs. Ira Matter who has been ill is able to be out again. Mr. Matter is still a guest at the homes of relatives in Berwyn and Lyons.

The Orland Park Volunteer Fire Department met Monday night. A number of committees were appointed in connection with the dance the firemen plan to hold in the near future.

The Orland Park School yard has been cleaned and beautified. An inspector from the state school department visited the school the past week.

Dr. W. R. Schussler has gone to Texas on a business trip.

Chase Says Uni. Repays by Research

Science Finds Better Processes
for Industry and
Agriculture.

By HARRY WOODBURN CHASE
President of the University of Illinois.

There has been a good deal of discussion in recent years of the large amounts of money it costs to support colleges, universities and other institutions of higher education. This is especially so in the case of publicly supported institutions and particularly in times of economic depression when officialdom feels the necessity of curtailing, so far

as possible, unnecessary expenses of government in order to reduce the burden of taxation. It is, therefore, appropriate at such a time as this for public bodies to give the people information about activities they are called upon to support.

Few people who have had the opportunity of a higher education question the social and economic value of universities and colleges; a great many, not so fortunate themselves, appreciate the importance to society as a whole of maintaining these institutions. But there is a vast number of people who have had no direct contact with colleges and universities either themselves, or through their children, and who naturally may not understand the indirect value to them of the work which these institutions are doing.

"What does the University of Illinois do for me that I should be called on to support it?" such a citizen of Illinois may ask himself. He may know that his State University is educating each year thousands of young men and women to prepare them for the various walks of life.

He may not question the importance and value of giving the young people of the state an opportunity to secure a college education because, after all, he realizes that the cost of educating them is simply a good investment on the part of the state and local community in their future citizenship. But what immediate benefits does he himself derive from the University of Illinois aside from the satisfaction of supporting an institution which gives his neighbor's child a higher education that they may live better and more useful lives?

The answer is simply this: Through its scientific investigations it has discovered facts and principles which are worth millions of dollars annually to agriculture and the industries, to say nothing of their value to human welfare in general.

During the year I pointed out to the people of the state that, in addition to teaching the many thousands of your sons and daughters, the research work of the University had already contributed new and better ways of industrial and agricultural processes which mean a return of more than one hundred million dollars annually to the state and nation. All of this concerns "applied" science.

In addition, may I also call your attention to the work of our staff in "pure" science dealing with fundamental principles, the practical applications of which may be of great value when they are developed, and the scholarly work of the faculty in other fields.

All of this should be borne in mind when one considers the cost of maintaining the University. Such work goes constantly forward in our laboratories. Besides educating some fifteen thousand students annually, from one-fourth to one-third of the University's funds and a similar proportion of the energy of its faculty are devoted to its various scientific and scholarly research activities. The annual cost of the University to the state, considered by itself, may seem large, but even the total state tax is only a small proportion, less than 10 per cent in most cases, of the total tax paid in each community. Of this total only about 2 per cent goes to the University. Out of all taxes paid by citizens of Illinois for every purpose, including federal taxes, less than 1 per cent would represent the cost of the University. In other words, any comparison of the cost of maintaining the University of Illinois with other public expenditures will show that it is small, even negligible. And when one considers the social values it creates and the practical returns of its scientific work, any such comparisons make its cost utterly insignificant.

To Which We Add, "Amen"!

The University of Illinois is a vast Laboratory of science and citizenship built by and for the people of Illinois . . . and it has more world contacts growing out of solution of practical problems of existence than any other school in the country.

Colorful Tomatoes

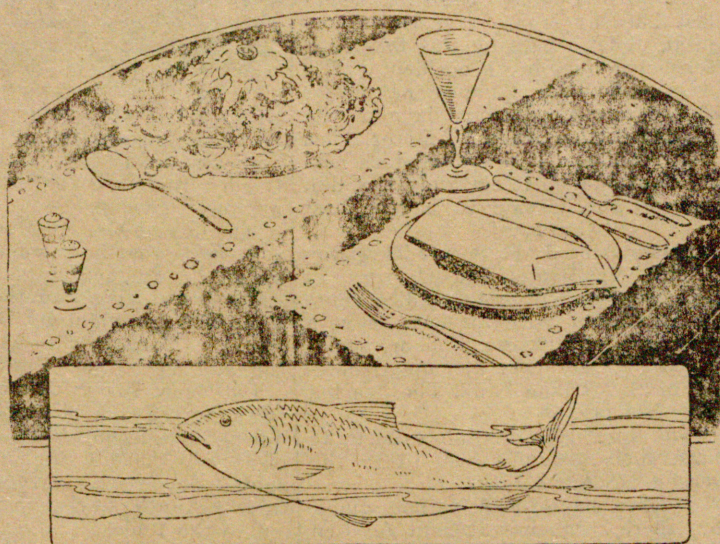

RED is the Christmas color, and one of the most beautiful reds of the palette is "tomato red." Enliven your holiday menus with plentiful dashes of this gay shade about which artists and decorators are doing as much talking today as are health and home economics writers about the "newly discovered" health-giving qualities of the tomato.

A Bit of History

It seems they are not so newly discovered after all. While for many years European and North American mothers were saying "Children, keep your hands off that naughty vegetable—it's pretty, I know, but it's poisonous!" other countries seem to have had a better opinion of it. The Aztecs had discovered that it was healthful to eat tomatoes,

and the Indians of Central America baked it and found it good for sore throats. It has even been suggested that the vegetable was named after Saint Thomas who, it is claimed, taught in Mexico and urged the Mexicans to cultivate it and drink tomato juice.

Be all this as it may—those who are best informed today urge us to eat more tomatoes. The United States Bureau of Home Economics recommends them in the diet at all times, fresh or canned, as the best single food for supplying four of the most important vitamins, as a preventive of a number of diseases, and as an important article of nutrition. Canned tomatoes are especially recommended for economy menus, because of the low prices prevailing today, though shortages indicate that prices will soon be higher.*

Salmon for Summer

RICH in all the essential, body-building proteins, high in the necessary mineral elements for the construction of a straight and sturdy bone framework, a conveyor of iodine from its reservoir—the sea—to mankind threatened with goiter, the source of a mysterious pellagra—preventive substance, a tasty, toothsome food is salmon. But people don't like to eat many hot foods in summer, and that is why salmon can play a leading role in summer food. It lends itself excellently to all sorts of cold dishes.

Cold and Comforting

Here are a few recipes for its use which will undoubtedly suggest more to the experienced housewife.

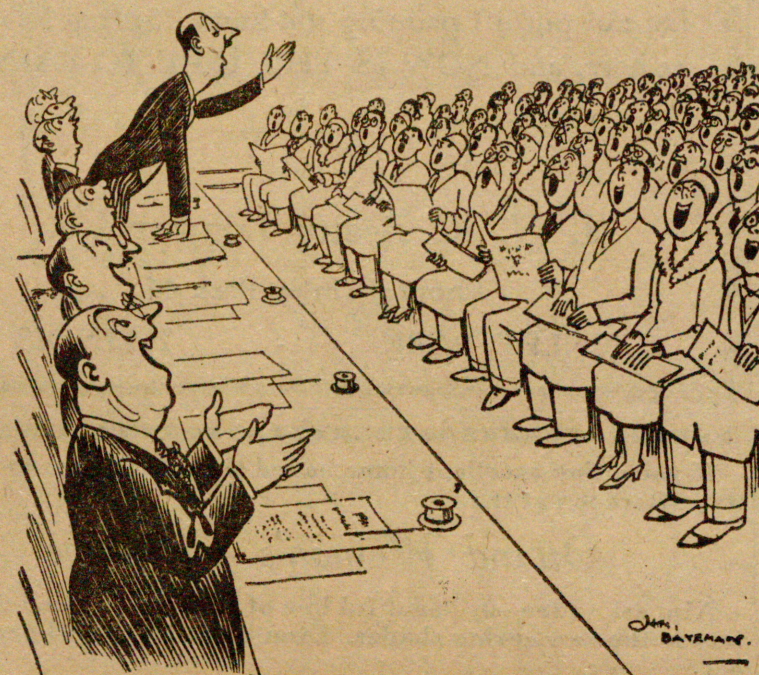

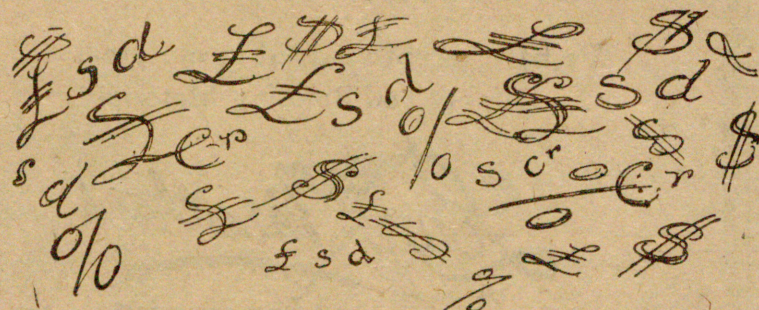

Spiced Salmon in Cucumber Boats: Remove the contents of one large can of salmon and mash well with a fork. Boil together

for two minutes three-fourths cup vinegar, twelve whole cloves twelve peppercorns, six allspice berries and one-eighth teaspoon salt. Pour over the salmon and let stand for several hours. Drain and serve cold in cucumber boat or on lettuce garnished with sliced cucumbers. Serves eight.

Salmon and Rice Salad with Deviled Eggs: Mix very gently together, so as not to mash, the contents of a No. 1 can of salmon one cup boiled rice and one and one-half cups sliced celery. Marinate thoroughly in French dressing. Add one tablespoon capers, one-fourth cup chopped sweet pickles and one-fourth cup sliced radishes, and moisten slightly with mayonnaise. Arrange in a large bowl, lined with lettuce, mash with mayonnaise and arrange four deviled eggs around the edge. This, too, serves eight.*

State, Nation Benefit Millions From Uni. Work

Institution's Results Contribute \$100,000,000 Annually to Welfare of Citizens.

"The value of research contributions of the University of Illinois to the state and nation exceed one hundred million dollars annually."

Such was the outstanding announcement made during the year by the University. It came with the publication of a booklet which told of many of the important contributions of this capstone of the state's educational system.

"The reading public hears a lot about the millions of dollars that industrial concerns are putting into research, and everyone knows how living has progressed as a result of these investigations, but very few persons realize what is going on in the laboratories of educational institutions," Joe Wright, an administrative officer of the University, said. "It is not in the spirit of boasting that we show in this publication how, in the two fields of industry and agriculture alone, facts given from this institution exceed greatly the figure mentioned. In fact, just eleven of the projects exceed that amount."

"In engineering," says the bulletin, "these achievements have been incorporated in building projects of many lines, in railroad operation and maintenance, in heating our homes, and in many other ways. In agriculture hundreds of projects have contributed soil and crop improvements, and have affected every phase of agricultural life in the interest of more profitable and better living conditions on the farm."

"A prominent industrialist spoke of one of our research projects in engineering which meant 'ten millions of dollars annually in the Chicago area alone,' and one agricultural project 'is worth twenty-nine millions annually.'"

A few of the hundreds of research problems and their value to mankind, which the bulletin mentions, are summarized below:

"The railway engineering department of this year," it says, "through tests completed last summer, indicated that a possible saving of \$25,000,000 annually in the operation of 40,000 of the larger type of locomotives on American and Canadian railroads might be realized through the use of the thermic syphon, an appliance for the locomotive firebox."

"Because of alkaline water, high-pressure steam boilers have had to be replaced frequently, sometimes every three or four years, whereas a boiler should last 20 to 30 years. Now after more than six years of research the Illinois chemical engineers have found what has caused the damage and have found methods of prevention. It has been estimated that the Chicago area alone will benefit at least \$10,000,000 annually as a result of this discovery."

"The costly process of distilling water for ice manufacture can be eliminated, University experiments have proved, and as a result an annual saving of several millions of dollars is possible in American plants."

"The more recently erected homes in America using warm-air heat may thank the University of Illinois for the improved plants and installations, and for the resulting comfort and economy. Other important contributions have just been made in steam heating practices."

"The limestone-legume project of the University's College of Agriculture is returning dividends at the rate of more than 24 cents an acre and this is but a single one of the 379 research and extension service projects which the University is conducting through its agricultural unit. This one agricultural project annually pays the state's yearly investment in the University."

"That limestone and legumes must be used for efficient crop production was one of the earliest findings of the college and is now one of its most popular teachings. Assuming that farmers will maintain the 1929 rate of limestone use, it will add \$7,400,000 annually to the wealth of the State of Illinois."

"More than one million dollars a year is being added to the net income of Illinois swine raisers as a result of the swine sanitation extension service project being furthered throughout the state. Careful estimates by counties indicate that more than 20,000 farmers, or one-tenth of the number in Illinois, use this system in raising hogs."

U. of I. Works Against Fakery
The University of Illinois worked against unscrupulous magazine salesmen who represent themselves to be connected with the University or "getting graduation credit" for the work. The University has no such connections.

From several sections of the state have come complaints of the discounting methods and tactics of these self-styled University representatives. "No credit, no commissions, and no other considerations, are in force or even recognized by the University for any such persons," President Harry Woodburn Chase said. "Any fraudulent representations such as these should be reported immediately to your local authorities."

Dads Support University
The University of Illinois Dad's Association is a state-wide organization of fathers of students. Every county in the state is represented in its membership for every "Dad" automatically becomes a member when his son or daughter enrolls as an Illinois.

The officers are as follows: President, C. C. Nicholson, Decatur; vice president, J. M. Sheets, Orling; secretary-treasurer, Oris Barth, Urbana; executive committee, W. H. Wheat, Rantoul; A. C. Gauen, Collinsville; Chas. Taylor, Harrisburg; C. S. Reed, Monticello; Wm. M. Acton, Danville; and Robt. J. Locke, Glen Elia.

IT PAYS TO ADVERTISE IN THIS PAPER. TRY IT!

Radio Brings Uni. Work Into Home

Leading Educators Lecture Daily Over State-Owned Station.

Packed full of highly important educational matter, radio station WILL, owned and operated by the University of Illinois, continues to serve its thousands of regular listeners.

The University is expending a great deal of energy attempting to take to radio listeners within range of its station some really worthwhile things of an educational nature.

Two periods of actual classroom work as well as approximately an hour and a half of other worth-while material is offered each day. Microphones are put into actual classrooms each morning for the 8 to 8:50 period from Monday to Friday inclusive, and again from 11 to 11:50 from Monday to Saturday inclusive. Immediately after the 11 o'clock classroom period there follows the daily agricultural talk by members of the College of Agriculture staff.

The period from 5 to 6 o'clock each afternoon is given over to worth-while musical broadcasts interspersed on the average with two educational talks of ten minutes' duration each. All talks are given by members of the faculty, and the music furnished is by faculty and students.

The classroom broadcasts are:

8 MWF—Professor A. H. Lybarger: "History of Europe, 1914-1932."

8 TT—Dr. E. L. Erickson: "The British People in the Victorian Age."

11 TT—Prof. Alta Gwinn Saunders: "Sales Letter Campaigns and Advertising Copy."

11 MWF—Prof. J. W. Albright: "The Principles of Sociology."

11 S—Coleman R. Griffith: "Educational Psychology."

Station WILL operates on 390 kilocycles or 39 meters. The Federal Radio Commission allows the station only 500 watts of power during daytime, and only 250 watts after sundown.

AN EDITORIAL

What is the University of Illinois worth to you?

A recent bulletin of the University shows that the state's highest educational institution is returning to the state and nation, in discoveries and research alone, more than \$100,000,000 annually. As a citizen of the state of Illinois, you directly or indirectly, receive the benefit of much of the University's work.

"It is impossible in most instances to interpret in dollars and cents the value of the University's research contributions," the bulletin says. "However, very little figuring, and less imagination, is needed to demonstrate that many millions of dollars are annually given back to the state in the form of returns on its investment in this institution."

Indeed one friend of the University said recently that the value of these discoveries "probably approximates a hundred million dollars a year—certainly many times the amount the state appropriates for all purposes—teaching, research, and building."

While the bulletin does not attempt to show the value of all University research, it does list contributions of the University to the state in industry and agriculture alone that mean an annual saving of \$100,000,000.

"The discovery of Illiumin, the only chemical element ever discovered in America; the production of Illium, a new metal which can be substituted for platinum in many instances; the very definite contribution to the treatment of leprosy; the low temperature process for coking Illinois coal which returns byproducts worth more than the original cost of the fuel; the great series of investigations in the money market, and commercial fields in general; the development of the serum for combating ptomaine poisoning, and others, are stories perhaps already well known," the bulletin explains in apology for much left out of the publication.

It continued: "Our medical and dental staffs have added much to human welfare through their investigations. The chemists have added their contributions, as has the electrical engineering staff, the departments of architecture, entomology, geology, zoology, botany, and others; one might safely say that no one department of the University has failed to contribute its full quota to the world's knowledge."

The University of Illinois continues to be not only one of the world's great teaching institutions, but one of the greatest investments the state of Illinois has ever made.

Control of the University

The control of the University of Illinois is entrusted to the Board of Trustees, elected by its owners—the citizens of the state. The Board consists of two ex-officio and nine elected members.

The present trustees charged with the control of the State's highest educational institution are: Gov. Louis L. Emmerson and Francis G. Blair, superintendent of public instruction, ex-officio members; George A. Barr, Joliet; Mrs. Laura B. Evans, Taylorville; Mrs. Helen M. Greig, Pittsfield; Dr. William L. Noble, Chicago; James W. Armstrong, Rock Island; Merle J. Trees, Chicago; Edward E. Barrett, Chicago; and Walter W. Williams, Benton.

Mr. Barr is president of the Board. Other officers include: Frank M. Gordon, Chicago, treasurer; Lloyd Morey, Urbana, comptroller; and Harrison E. Cunningham, Urbana, secretary.

Our prices on printing are not always the lowest... but our work is always the best

Farming Still "Big Business"

U. of I. Training Ground for Industry Worth Billions.

Farming is still "big business" in Illinois. The training ground for that gigantic industry is the courses which are offered farm boys and girls at the College of Agriculture, University of Illinois.

Dean H. W. Mumford points out that according to the latest census figures, the total value of farm property on Illinois' 214,497 farms is \$3,786,661,124. In other words, every farm in the state represents an average investment of more than \$17,600 in farm property.

Any business man knows that an enterprise of this scale does not run itself; that it must have the direction and guidance of skilled and trained workers. Agriculture realizes this, too. In fact, all but six of the smaller counties out of the 102 in the state are represented in the enrollment of more than 600 students in the College of Agriculture.

An army of 214,000 trained farm operators is not all that Illinois agriculture needs if it is to succeed and flourish under the stress of economic conditions. In one way or another agriculture touches the life of every citizen. The industry has so many relationships that its training ground—the agricultural college—is called upon to send a stream of trained workers into many fields other than farming.

Just as one example: practically everybody eats meat and there has to be a slaughtering and packing industry to take care of this need. In fact, this industry is the leading manufacturing enterprise of Illinois in point of value of output. There are 81 establishments with 26,609 employees earning \$11,246,967 annually and putting out products valued at \$663,054,316.

Many of these 26,609 employees of necessity must be men with an agricultural college training. There must be stock buyers who know how to pick animals that will yield the kind of meat the public wants. There must be buyers who can quickly appraise the value of animals so that the packing industry must have men with an agricultural college background. Packing concerns may even go so far as to refine the art of cooking meat, and for such work there would be required the services of women trained in home economics.

Another example is the agricultural implement manufacturing business. There are 46 such establishments in Illinois and at least some of their 17,811 employees need to be men with an agricultural college training. These workers earned \$26,337,328, and had an annual output valued at \$102,216,815, according to the 1927 U. S. census of manufactures.

In like manner, fertilizer companies, feed manufacturers, cereal food and processing companies, flour mills, sugar beet factories, canneries and dairy supply houses need men and women with training in agriculture and home economics.

The agricultural college, as the training ground for this gigantic industry and its allied interests, also is called upon to supply creamery men, ice cream manufacturers and milk dealers. It also must meet the demand for workers in the colleges or experiment stations, in government service, in county agent or extension work, and for inspectors, seed analysts and regulatory workers.

Other trained workers are needed by the daily press, the agricultural papers, the trade journals, farm organizations that employ secretaries and publicity men, the breed associations, research institutions and trade bodies employing salaried assistants. In addition there can be mentioned rural banks, hardware concerns, lumber companies, country newspapers, rural churches, bond houses, farm loan associations, insurance companies, real estate agencies and auto, truck and tractor companies.

The Illinois College of Agriculture attempts to meet these demands by training students in four special courses permitting specialization in general agriculture, in home economics and in floriculture. Technical work in different courses is closely associated with the related sciences and cultural subjects to further the development of cultivated and versatile men and women.

Any motion of the piers can be detected and steps taken to prevent its continuation if precision instruments are used, said Prof. Wilbur M. Wilson, in charge of the study.

The five bridges studied were the north and south bridges at Yorkville, Ill., the Washington Street bridge of Rockton, Ill., and the Oliver Avenue and Kentucky Avenue bridges of Indianapolis.

"The movement of the piers, although small, produced an appreciable strain in the concrete," said Professor Wilson. "The strain often occurred when the concrete was green. It did not occur instantaneously, but over a considerable period of time, hence did not produce stresses that would seriously affect the safety of the structure."

"On the whole, the results of the observations made on these bridges are reassuring," he said. "They indicate that pier movements during construction will not be excessive if proper precautions are taken."

"The movements reported were so small that they could not be detected without use of precision instruments, yet the stress resulting from these movements is considerable."

UNI. ALUMNI BODY SERVES 100,000 FORMER STUDENTS

Half of Illini Still Live Within the State.

Every university has its body of graduates and former students, known as the alumni. There are about 100,000 alumni from all sections of the University of Illinois, both Urbana and Chicago departments.

These 100,000 graduates and former students have their own organization, the 58-year-old University of Illinois Alumni Association. Its headquarters are in the Administration building on the Urbana campus. The Alumni Association offices are often called the headquarters of the Illini World. Here are kept the files of all the graduates and former students. There are Addressograph plates for about 70,000 of them, making it possible for mail to be addressed to them quickly by automatic machinery.

There are also files arranged by classes, and there is what is known as "the morgue," a vast collection of filing folders, one for each graduate and former student, in which are kept photographs, clippings, letters, and pamphlets. Separate files are kept for books written by graduates and former students, for engravings of them, and for various other purposes.

In the Alumni Association office is edited and published the Illinois Alumni News, the official publication of Illinois alumni and the chief medium of exchange for news of them.

The Alumni Association in general works with and for alumni mainly through the classes, of which there are 50 from the Urbana departments; and through community organizations, known as Illini clubs, located in most of the larger cities and in many of the smaller towns. News of the classes and of the clubs is published regularly in the Alumni News. Class reunions and Illini Club meetings are actively promoted.

The Alumni Association, the parent organization of all these activities, is governed by an Executive Committee consisting of the president, two vice-presidents, and nine directors, all of whom are elected by mail ballot. This executive committee in turn appoints three men who are in active charge of the Alumni Association and all of its activities.

These men are at present Carl Stephens, general secretary of the Association and editor of the Alumni News; Robert Reitsch, alumni secretary, and Glyn Goodwin, alumni recorder and treasurer.

Working with these three men is a staff of secretaries, stenographers, and clerks. They are kept busy writing letters, editing copy, correcting record cards, and doing many other jobs incidental to taking care of a family of 100,000 people.

The road between alumni and their alma mater leads through the Alumni Association. Traffic is in both directions. All Illini, graduate or non-graduate, faculty or former faculty, are eligible for membership in the Association.

PALOS PARK

A "Jungle Sale" will be held in the basement of the Presbyterian church Thursday, afternoon April 14th. Articles of a varied nature will be on sale also shrubs, plants, biological specimens, suitable for the home aquarium and rock gardens also salamanders, fish, snails, crawfish, and turtles and home bakery goods.

The Park Players will give a play entitled "The Burglar" on the evenings of April 29 and 30. The cast is as follows: Mable, Irene Liszt; Valerie, Grace Baker; Freda, Cora Wells; Edith, LaVerne Wahn. The Players will give two other plays at a later date, "Mother Is Right" and "Betty Behave".

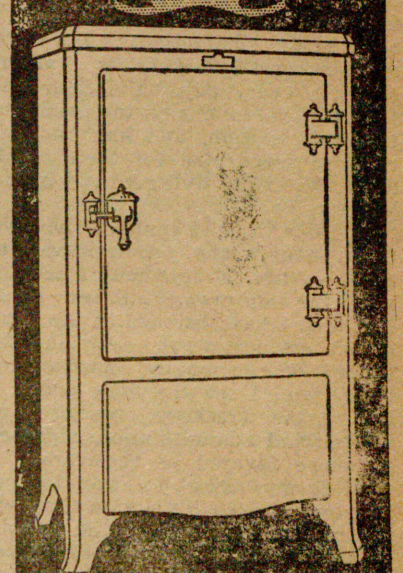

The Pail O'Sparks defeated the Mt. Greenwood basketball team Thursday evening by the score of 33 to 10.

Mrs. John W. Gorby of the Pageant of Progress was the speaker at the Woman's Club meeting Thursday afternoon. The hostesses were Mrs. Edward Hyink, Mrs. George Weeks and Mrs. Frank Yunker.

The annual business meetings of the Presbyterian church and Sunday school was held last Wednesday evening. The old officers were re-elected with the exceptions of Mrs. M. Christie deaconess, Mrs. Edith Wells sponsor of the Senior Department of the Sunday school, Mr. A. Biner, treasurer.

Next Sunday April 10th, Byron Hyink will assist Mrs. Thomas in the church service. The sermon will be the story of the life of the missionary, Wm. Grenfall of Labrador. Little Rosebud Hyink will speak 'a piece' and Mrs. Hyink may sing a solo.

Oak Forest Man Making Strong Race

In the race for state representative of the Seventh Senatorial District, James T. Hickey of Oak Forest, running for nomination on the regular Democratic Ticket, is gaining strength every day. His clear and forceful expressions on the needs for better legislation, and his practical, common sense plan for their enactment, are being well received by his hearers.

"I come in daily contact," he says, "with many, many, people in various walks of life. Everywhere, I see the need for improvement in our banking laws. I have listened to the story of life savings swept away in the failure of criminally mismanaged banks, and I see the little which is left in the wreckage, swallowed up in fees and administration expenses, by those favored as receivers. I shall do my utmost to force the enactment of such legislation that will protect the deposits of the people, and that the state shall stand as surety behind each State Bank. And the punishment of the banker betraying the public trust shall be sure and swift."

"The search and seizure act must be repealed for it has degenerated into a racket. In its place, I favor the legalized sale of light wines and beer under state control, for I know that the revenue from this source will go a long way toward lifting the tax burden from the shoulders of the tax-payers, and will deprive the criminal element of their greatest source of revenue and income."

Mr. Hickey has been engaged in the undertaking business in Oak Forest, Illinois for the past five years. He is a young man of mature judgment, who has won the respect of all with whom he has come in contact, and is making this race at the urging of his many friends who believe in him and his ability to serve the people.

CIRCULATION STATEMENT

Statement of the Ownership, Management, Circulation, etc., required by the Act of Congress of August 24, 1912.

Of The News-Bulletin published weekly at Mokena, Illinois, for April 1, 1932.

State of Illinois, County of Will, ss. Before me a notary public in and for the State and county aforesaid, personally appeared Wm. Semmler, having been duly sworn according to law, deposes and says that he is the owner of the News-Bulletin and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management of the aforesaid publication for the (date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, to-wit:—

1. That the names and addresses of the publisher, editor, managing editor and business managers are: Publisher, Wm. Semmler, Mokena, Illinois. Editor Wm. Semmler, Mokena, Ill.

2. That the owner is: Wm. Semmler, Mokena, Ill.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities, none.

That the two paragraphs next above, giving the names of the owners as they appear upon the books of the stockholders, and security holders, if any, contain not only the list of stockholders and security holders company but also, in case where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association or corporation has any interest direct or indirect in the said stock, bonds or other securities than as so stated by him.

WM. SEMMLER, Owner

Sworn to and subscribed before me this 8th day of April, 1932.

Services on Sunday will be conducted in the German language.

The Ladies Aid meets on Thursday April 14th. Young People's society meets on Friday April 15th.

ST. JOHN'S EVAN. CHURCH

Theodore E. Lapp, Minister
Church school 9:30 a. m. every Sunday.
Divine Worship 10:30 a. m. every Sunday.

Friday April 8th, Boy Scout Nite at our regular monthly Brotherhood meeting. Stunts, speaking, games and eats.

Sunday April 10th, no church services in the morning. Church school will convene at the usual time. Rev. Lapp will be absent and Rev. G. Gerhold of Frankfort will preach at the evening service at 7:45 P. M. We invite Mokena to hear Rev. Gerhold.

Tuesday April 12, regular monthly meeting of Young People's League. Special program in honor of this year's confirmation class. Miss E. Krusemark, speaker.

Thursday April 14, monthly meeting of Sunday school teachers and officers and Teachers Training class.

Mr. and Mrs. Bud Jacobs of Blue Island spent Sunday in the home of the latter's parents, Mr. and Mrs. J. Horras. Mr. and Mrs. Oscar Jacobs also of Blue Island were guests in the evening in the same home.

Mrs. Minnie Schmidt Randolph, daughter of Mrs. Emma Schmidt surprised her friends when she announced her marriage with Herman Bielfeldt of Crete, Illinois on March third. Mr. and Mrs. Bielfeldt are living in Chicago Heights.

**Chuck Formento's
ORCHESTRA**

Mrs. Ed. Lyons spent the week end with friends in Oak Park, Ill. The Mokena Garden Club will meet next Tuesday afternoon in the home of Mrs. Kate Cooper.

The Iris Garden Unit met at the home of Elsie and Kurth Hellmuth Monday after school. Several members read stories about the trees on the streets of Mokena. Honor stars were awarded. June Schoeneck and Dorothy Eiler told off the Flower Show in Chicago. A flower seed exchange will be held at the next meeting which will be in the home of Evelyn Paulson, on May 2nd.

The Ladies Aid Society of the M. E. Church will meet in the home of Mrs. Elmer Sippel Thursday afternoon April 14th.

Mrs. Wm. Dupras spent Sunday in the home of her sister, Mrs. Chas. Mau.

The Gladioli Garden Club Unit met at the home of their sponsor, Mrs. H. Mall Monday evening. The Misses Dorothy Homerd and Evelyn Moore were the hostesses and served a delightful luncheon at the close of the meeting.

Miss Celia Cooper visited with relatives in Orland this week. A good number of Mokena people

attended the Flower show this week.

Mr. Chas. Burkhardt underwent a second operation Wednesday evening in St. Francis hospital, Blue Island. We hope he will be much improved now.

Mr. and Mrs. Arthur Lambrecht and son and Mrs. Eichmeier of Frankfort visited at the News-Bulletin office Tuesday forenoon.

Mr. Edward Schenkel had the misfortune of having his auto catch afire from a short in a switch and burn. A new body is being re-built in Joliet.

Francis Moriarty, has returned to Perdue University after spending the spring vacation with his mother, Mrs. Rose Moriarty and daughter.

A number of Mokena people attended the Democratic rally in Joliet Saturday evening.

CARD OF THANKS

I wish to thank all those who attended the bunco party which I sponsored at the St. Mary hall last Sunday afternoon and for making it the success it was.

COMMITTEE ON LICENSES

MOKENA

SCHOOL NEWS

On Friday, April 1, a representative from the Public Service Company gave an illustrated talk on "Know Illinois". The slides were very interesting and instructive. The first ball game of the season will be played at Mokena on Friday,

April 8, with Orland at 3:30 p. m. The honor roll for the school is as follows:
Grade 4 Dorothy Eiler, Charles Hostert, Robert Krapp.
Grade 5 Evelyn Poulsen.
Grade 6 Bernice Hostert, Grace Warning, Arnold Bertelson, Eileen Walsh, Ada Semmler.
Grade 7 Grace Moriarty, Alice

Lauffer, Helen Poulsen.
Grade 8 Dolph Oswald, Bernice Muehler, Edward Lauffer, Edwin Yunker, Gertrude Sippel.
High school Vivian Walston, Erwin McGovney.
The fourth graders are greatly interested in their arithmetic at the present time as they are learning how to do long division. The eighth grade has begun the study of algebra this week. Everyone seems to be very much interested and fine progress is being made.

Francis Rinke is to represent the Mokena grade school in the annual Will County "Mibs" tournament to be held in Joliet on Saturday, April 9 at 1:30 at the Joliet Herald-News building. Francis won this right to represent Mokena by defeating Frank Drewett for the championship. Should Francis win the tournament or be one of the four semi-finalists, he will be taken to Chicago on June 15 to see the "White Sox" play the Yankees and to meet Babe Ruth personally.

The Sophomores have taken up the study of Shakespeare's "Julius Caesar", while the Freshmen are studying "The Merchant of Venice". The Sophomore graduating play is entitled "The Alley Daffodil" by Elsey. Work is to start immediately and the class promises the public a most worthy production. The play will be presented in May.

A musical and literary miscellaneous program is being planned by the grade and music teachers which is to be given Friday evening, April 22. The following first and second grades on the honor roll in Miss Doig's room:

Grade 1 Marlys Krapp, Violet Stanger, Hyacinth Rinke, Deletta Werner.
Grade 2 Evelyn Meyer, Doris Coler, Betty Marti, Charlotte Gorney.

Ralph E. Coler has purchased a vacant lot of 100 feet north of their present property from Milton Krapp the past week.

A benefit 500 and bunco will be given at the St. Mary hall on next Thursday evening, April 14 at 8 p. m. Everyone is cordially invited.

The bunco party held at the St. Mary hall, Sunday afternoon by Mrs. Charles Mau was well attended, 8 tables playing. The proceeds totaled \$28.35. Thirty-six prizes were awarded the winners.

Miss Virginia Voight of Joliet has been a guest at the Don Hall home this week.

Wm. Niethammer of St. Louis is visiting with Mokena relatives.

Rev. Paul E. Schaefer attended a church conference in Chicago Wednesday.

VILLAGE ORDINANCE NO. 263 AN ORDINANCE ON LICENSING DOGS

Be it ordained by the President and Board of Trustees of the Village of Mokena, Will County, Illinois.
Section 1—That it shall be the duty of each person being the owner or keeper of a dog or dogs, or who keeps a dog or dogs, upon his or her premises, to take out a license for each dog so owned or kept by him or her, and to pay for the license fee provided for in section 2 of this ordinance.

Section 2—That any person or persons, owner or owners or keepers of any dog or dogs in the Village of Mokena from and after the time this ordinance shall be in force until and including the 31st day of December, 1932 be and are hereby requested to pay to the clerk of said Village a license fee of one dollar (\$1.00) for a male dog and one dollar (\$1.00) for each sterilized female dog and three dollars (\$3.00) for each unsterilized female dog; however, dogs kept in kennels for breeding, sale or sporting purposes shall not be assessed an individual license fee but the owner or keeper of such kennel shall pay a kennel license fee of ten dollars (\$10.00) for twenty dogs or less, and five dollars (\$5.00) for each additional twenty dogs or fraction thereof, kept in such kennel.

Upon the payment of the license fee, the clerk shall issue to the owner or keeper, of each dog or kennel, a metallic tag for each dog licensed or kept in such kennel. The tag shall bear the name of Mokena, a serial number corresponding with the license number kept on record by the clerk and the calendar year for which it is issued. Every owner or keeper of a dog or dogs shall keep a substantial collar around the dog's neck and shall keep the metallic tag firmly attached thereto. Any person becoming the owner or keeper of a dog for which for any reason the clerk has failed to collect a license fee, must at such time apply to the clerk for a license, and upon payment of the required fee procure a metallic tag.

All license fees collected in accordance with the provisions of this ordinance shall be turned into the general treasury.

Section 3—That any person or persons, owner or owners or keepers of any dog or dogs or kennel in the Village of Mokena violating the provisions of this ordinance shall upon conviction pay to said Village a fine of not less than three dollars (\$3.00) nor more than ten dollars (\$10.00) for every such offense.

Section 4—The Police Constable of said Village or any person or persons authorized by the Village Board of Mokena to act in place of the Village Constable finding any dog belonging to any person or resident of said Village running at large without said license shall be and are hereby authorized and directed to destroy all such dogs and report same to the Village Board. For every dog so destroyed he shall receive the sum of one dollar. (\$1.)

Section 5—That all ordinances or parts of ordinances conflicting with any of the provisions of this ordinance or any section thereof are hereby repealed.

Section 6—This ordinance shall be in full force and effect from and after its passage, approval and publication according to law.

Passed this 30th day of March, A. D. 1932.

PAUL J. ROESENER,
Village Clerk

I hereby approve the above and foregoing ordinance this 30th day of March, A. D. 1932.

JOHN C. NIELSEN,
President of the Board of Trustees
Attest:
Paul J. Roesener,
Village Clerk.

☒ William Semmler

REPUBLICAN CANDIDATE FOR
Precinct Committeeman

2nd Precinct, Frankfort Township,
Will County, Illinois

Primary Election, Tuesday, April 12, 1932

Platform of Bruce Campbell

Candidate for Democratic nomination for governor, stands for the following:

Honest, efficient and economical government.

Fair and equitable assessment in proportion to value of all classes of property with discovery and assessment of hidden assets, thereby reducing taxes on real estate.

Prompt payment of adequate compensation to all public employees.

Banishment of wastefulness and extravagances from State government, reorganization and coordination of governmental departments and activities and abolishment of useless and unnecessary offices.

Fair and equal treatment, without discrimination, of all sections of the State and fullest co-operation with Chicago and Cook County in settling the problems peculiar to them.

Representation in legislative bodies to be in proportion to population so that every citizen, wherever he resides, will be the political equal of every other citizen.

Repeal or modification of the 18th amendment so as to permit the states to determine their own policies on this question.

Encouragement of legitimate business, taking the government out of business except insofar as is necessary to promote and fully protect the health, safety and welfare of the people.

Full recognition of the rights of labor with full protection for the life, safety and working conditions of laboring men and full and fair compensation in case of injury or death, and full recognition of the right of labor in the matter of wages and working conditions to deal with their employers through representatives of their own choosing.

Limitation of rates of public utilities so as to provide only a fair return consistent with adequate service upon the value of facilities devoted to the public use.

Restoration of prosperity in business, mining and agriculture to be the first and most important tasks.

No promises except those made out in the open to all the people.

Application of common sense and business principles to the affairs of government. A fair and square deal for all and special privileges for none.

**VOTE FOR
BRUCE CAMPBELL**

Primaries
Tuesday
April 12th

Primaries
Tuesday
April 12th

**The Only Candidate
For Democratic Nomination
FOR
GOVERNOR
Who Does Not Live in Chicago**

Why jeopardize Illinois Democracy by a factional fight over Cook County spoils? Republicans are saying that every time the Democrats have a chance to win they throw it away. Don't let the personal and factional fight for political leadership between Cermak and Igoe spoil Democratic chances for victory this time. Nominate **BRUCE CAMPBELL**, the only candidate

who can surely carry the Democrats to success in November.

He can defeat any candidate the Republicans nominate, and he is the ONLY one who can. Even the Republican candidates admit that Campbell's nomination means their defeat. Campbell will get a quarter of a million more votes in November than either of his opponents.

Elect your local candidates by nominating BRUCE CAMPBELL to head the ticket

He stands for:

- Sympathetic cooperation with agriculture.
- Just and equitable assessment of all property, real and personal, relieving real estate of the unfair burden it now bears.
- Honest, economical and efficient administration of government, reducing waste and extravagance.
- Sympathetic cooperation with and fairness to organized labor.
- Reduction of taxes.

Let's win in November with Bruce Campbell

HEART OF THE NORTH

BY WILLIAM BYRON MOWERY

CHAPTER XI—Continued

His gray eyes, which through forty years of self-sacrificing service, had looked upon human weakness and hardships and heroisms, were filled with a profound sorrow. What cut him to the quick was this blow at his faith in Alan Baker. He had always liked Alan, had trusted him as he trusted few men; and had fought for his promotion. He, who had given forty years of his life to the service at a miserable salary; who with his brother officers of the old guard had unselfishly watched other men of their generation carve out fortunes in timber, ranches, land and mines in the developing West—he had thought of Baker as of one to carry on that tradition and spirit of loyalty to the Force.

Now, according to Inspector Haskell's account, Baker had quit because his commission last fall had not come. At the beck of a higher salary he had tossed aside loyalty and his invaluable work here in the North. He had made a miserable failure of a patrol, had imbued the other men with insubordination, and then bought out.

Stern and impartial, Williamson could not help feeling that Haskell, though a newcomer and not fully experienced yet, had been fair, and more than fair, in this trouble with Baker and these other men. Baker had certainly had a fearful moral lapse from the man he used to be. Without doubt his failure to get commissioned had set him brooding and had worked a pernicious harm on a once-superlative man.

As he looked thoughtfully at Haskell, Williamson considered it very creditable of him to praise a man who had done him so much injury. And he thought it showed exceptional stuff in the inspector to remain in service, to stick with his hard taskmaster work here in the North, when he had come into a large inheritance and might be leading a pleasant life in Ottawa. Playing no favorites whatsoever but trying to give every man his just dues, the old officer felt that his former uncharitable opinion of Haskell had been entirely wrong, as wrong and misplaced as his faith in Alan Baker.

Presently, in slow decisive tones, he said: "You did right to demote Baker after that patrol. It was foolhardy of him to split his detail. Constable Young over there will pay the price of that mistake for the rest of his life. And about those other men, I think the rough sledding you've had with them is easily explained. Baker was in charge before you came; he was rather lax on discipline so long as the work got done. One of the things urged against him when he was up for commission was the fact that he was too familiar with his subordinates. When you came and insisted on stricter discipline, I presume they resented it. The faults is theirs, not yours. I'm backing you to the limit against them and against Baker, too, if he tries to stir up any further trouble."

Haskell drew a deep breath. His story had gone across handsomely. In half an hour of skillful talk he had accomplished more than Baker could match in a month of labor and heavy expense and danger.

For Alan and Featherof there at MacMillan's trading post after their discovery of the catastrophe, the waiting was the worst of it—the long hour after hour of grim, self-enforced delay.

"We've got to let them get out of timber country into the open. Thal-Azzah," Alan spoke to Buzzard, who was looking to his experience and leadership in this fraught crisis. "There we can be sure of sighting their canoes. They'll have no shelter there, when we drop down on them. We'll make ourselves give them a fifteen hour start on us."

It was his cold man-hunting wisdom that spoke; but all his being clamored to start instantly, flinging himself against those men and tearing Joyce away from them before twilight fell.

He forced himself to go up to the trading store and cook a meal, for they had eaten nothing since dawn. . . .

He remembered the little automatic Joyce always carried; remembered the hard bulge of it that time he lifted her down from the window. Knowing her spirited pride, her passionate nature, he had fearfully imagined her choosing a proud escape from her horror. . . .

When he and Buzzard had forced themselves to eat supper and were putting the things in order again, as though for Joyce to come back and find, they heard a far-away drone miles down the Big Alooska. A breeze whipped the faint sound away for several minutes. When they caught it again, the sound was clear and unmistakable. They once had heard that same low throaty drone approaching

across En Traverse lake to destroy their plane and stop their venture.

Alan rose up, with an expression on his face that frightened Buzzard. "It's Haskell. He's coming to smash us. He didn't quit with that one attempt. I don't think—even if he knew that you and I are all that stands between Joyce and a horror—I don't think he'd hesitate a second. Buzzard, you stay here. I'm going down to the landing. I don't want you to be involved in—I suppose it'll be called murder."

He went out through the trading hall and down to the landing, and crouched there behind the machine gun. With his hand on the spade grip, training the weapon down river, he waited.

But, as he listened to the launch tearing wide open up the treacherous Alooska, he grew convinced that Whipple never would or could drive it at so demoniac a clip. Frank Pedneault was the man behind that wheel.

Uncertain, in a dilemma, he reasoned: "Haskell might have forced him to make the trip. But Ped would

What Cut Him to the Quick Was This Blow at His Faith in Alan Baker.

never throw himself into it like that, he'd never risk his life that way, unless it was something he felt like putting all his heart into."

Lifting the binoculars, he focused them on the first bend below. When the launch came tearing into sight and thundered on up toward the post, he saw at a glance that it carried but one man—a man with his hat jammed low on his eyes and a dead pipe in his teeth.

Swinging the launch around in mid-stream like a toy, Pedneault gently nosed it in beside the plane. "Thank Lord, you're here, Alan. . . . Was afraid you'd be gone—"

"Ped! What are you doing up here? You're on some patrol?"

"Patrol h—!" Pedneault panted, breathless and excited. "I caught onto your idea. Elizabeth told me about it, too. She's aching for you to win out. Larry and I talked it over. I said, 'By Lord, I'm going, Larry! I'm going to be in on that with Alan and Bill!' So I euchred the launch away from Haskell, pitched off, and streaked for here. Brought you some extra gas if you need any."

Alan was staggered. "Good Lord! And you've deserted, too, Ped!"

"But I couldn't miss out on a trick like this, could I?"

Alan winced. Here was Pedneault mixed up in his trouble. Like an eager wolf-hound whom his master has left behind, Ped had chewed his collar and come along on the hunt.

"Where's Bill and Joyce?" Pedneault's face grew long, his eager excitement sobered down. He decided it was better to say nothing just now about Dave's suicide. Alan had enough anxiety preying on him.

"I'm thankful for that gasoline," Alan said. "And for you throwing in with us, Ped, at the price you'll pay. But I don't see how you can help. We can't carry a third person on this trip. I'll have to have room to work the machine gun—"

"Then I'll go in the launch."

"You can't make it. Above the Alooska forks there's twenty miles of low water that you can't get through. I can make it now. I know what the launch can do. After all these heavy rains, draining down that left fork from the Thal-Azzah. . . . Look there—" he pointed at the water stage on a pier—"that's eighteen inches higher than when we made our first patrol after them. I can get through; and once I'm in those deep-water channels of the Thal-Azzah—"

"All right," Alan agreed. "You'll be a mighty big help. If they put us out of it, you'll be in position to carry on with them. Let's go up to the post and make our arrangements. You'll be leaving ahead of us."

Meeting Buzzard in the trading hall, he introduced Pedneault and explained. They went on back to the kitchen and worked out their plans.

Pedneault was to leave at dawn in the launch. Then the plane would leave at ten o'clock. Passing Pedneault just inside the Thal-Azzah, the plane would fly on ahead, locate the bandits and bring them to bay. The two craft would thus close in together for the battle.

There was but one hitch in the plan. All three men were aware of it, but no one mentioned it. Those bandits had Joyce with them; they could and would use her for protection. How could they be swept with a machine gun's deadly spray when she was with them?

It was something which had to be left to luck or fate.

Alan gave final instructions: "If anything happens to the plane, don't try to fight those five men by yourself, Pedneault. Swing wide of them, go on east to that big lake I mapped for you, and join Bill there. Then the two of you fight them to a finish."

"One other thing. I don't want Buzzard or myself to be charged with murder. You're in service, Pedneault; you'll not only be on a legitimate patrol, but you have the power to deputize us as special constables. We'll better put that down in black and white."

It seemed strange to Pedneault, who had sworn in half-breeds and Indian scouts and dog-team drivers on emergency occasions, to be swearing in his former officer commanding in, so lowly a capacity. He wrote out the formal authorization: James A. Featherof; status, special constable temporary; capacity, aviator. Alan McCleod Baker; status, special constable temporary; capacity, scout and machine gunner.

At the earliest hint of dawn they went down to the landing, inspected the launch and lashed Joyce's light canoe on the stern half-deck. Pedneault shook hands with them, slipped into the wheel seat, and set out alone, a solitary figure, up the Big Alooska.

Waiting, nervous and jumpy, as both had waited for zero hours in France, Alan and Buzzard stalked about the unutterably lonely post.

At nine o'clock, drawn down to the landing, they went over the plane for the third time, and Alan mounted the machine gun in the cockpit. When their zero hour came, he towed the craft out into midstream, held it there while Buzzard warmed the spluttering motor; and then, sending the canoe spinning with a kick, he sprang up into his seat.

Buzzard lifted the plane out of the river, climbed to five thousand feet, and headed into the northeast.

CHAPTER XII

The Swan Nest

Thirty miles above the Alooska forks, they caught up with Pedneault. When he saw that all was going well with him, Alan turned his glasses ahead again, sweeping the dozen waterways within vision. He picked up two tiny black objects creeping up a broad blue channel ten miles on into the Thal-Azzah.

Signaling Pedneault that they had sighted the canoes, Buzzard slowed down to stalling speed. Pedneault answered back that he understood and they saw him open out the launch till a long narrow V-wave of white froth stretched behind it. Then, winging on ahead, they closed in for the battle.

As they drew near and Buzzard dropped to a couple thousand feet, Alan began to make out figures in the two craft. His heart leaped as he counted six persons. Nearer still, he distinguished a slender girlish figure in the prow of the lead canoe. They must have found that gun on Joyce, or else she had clung to her faith that he would save her.

Half-raising, Alan glanced back westward to find how near Pedneault was. A puzzled expression crept over his face as he failed to glimpse the launch in either the Alooska branch or the broad blue channel. With a premonition of disaster clutching him, he whipped up the glasses, focused on the connecting creek, and caught the big boat in clear vision.

The thing he saw brought a cry into his throat.

The craft was not moving. It lay on its side, half out of water, hopelessly stranded. Either from reckless piloting or from an accident no man could have averted, Pedneault had struck a mud bar hidden under the treacherous muskeg water; and now the scarlet-and-gold launch, lodged solidly in the muck by the momentum of its headlong dash, was out of the battle for good and all. Pedneault could not even go and help Bill.

Alan tore his gaze away from this disaster. It was all up to him and Buzzard now. Pedneault was out, the launch was out; Bill was a hundred miles away, and alone.

(TO BE CONTINUED.)

Visit to Vik in Norway

In the ancient Hardanger village of Vik in Norway, the tourist will find an epitome of many of the attractions in this region. It is one of the oldest and most picturesque. Here will still be found some of the old turf roof cottages. The turf is laid on several layers of birch bark and is absolutely watertight. Spinning wheels and looms will also be found in some of the homes. The church is a typical peasant church of pre-Reformation days and one of the first of its kind. It has ancient frescoes and carved furniture, all the work of local talent. An ancient leather collection bag, fixed to the end of a long stick, has a small bell attached, to wake the sleeping worshiper.

Lists Soybean and Alfalfa Varieties

Advice Given on Record and Performances.

Low soybean and alfalfa seed prices this year may result in more of these two crops being grown, according to R. D. Lewis, extension specialist in farm crops at the Ohio State university.

Because of the fine record and performance made by soybean seed available locally, the variety Manchus should be preferred in 1932 for hay or grain production, he believes. There is a specially selected strain of Manchus here in Ohio that is superior to strains from other states, Peking, Virginia, and possibly Wilson are superior hay beans for southern Ohio. Only soybean seed that has been tested recently for germination should be purchased.

Alfalfa seed prices also are very low in 1932 and in some cases may be obtained as reasonably as red clover. On suitable soils some of it may well be included in the regular hay mixtures. Pure stands may be seeded at low costs where all conditions as to drainage and line forecast successful results.

For best performance and persistent stands, Lewis recommends the variegated alfalfas. Of these, the new Hardigan alfalfa from Michigan is superior. Grimm is a close second.

Good Growth of Alfalfa

Depends on Many Things

Careful planning is necessary to insure a good stand and growth of alfalfa. Many prospective fields have been unprofitable because they were not carefully selected and planned. Unsuitable fields, improperly prepared seedbeds, too thick and growthy nurse crops, and unadapted seed, are causes of failure that are most common.

Alfalfa requires a good loam soil that is well drained. Usually it does not do well on clay and most sand soils lack fertility to give it a good chance. A soil underlaid with gravel to provide natural drainage is desirable. It is useless to sow alfalfa on sour soils. If a soil tests acid it should be treated with limestone. Alfalfa feeds heavily on phosphorus and potassium, and as a crop of alfalfa is left for three or four years, it is essential that the soil be well supplied with these plant foods.

In selecting seed, get clean seed free from weeds. The seed should have been produced in a climate as severe as where the crop is to be grown. Seed produced in mild climates should not be used. The seed should be secured well in advance, as last minute purchases may be disappointing.—Prairie Farmer.

When Burning Trash

Many farmers are tempted to burn the weeds and trash along their fences to destroy weed seeds and the eggs and larvae of insect pests. Such burning will help to some extent, although most of the eggs and larvae are in the ground safely below the heat zone. It should be kept in mind, however, that burning off a heavy growth of grass or weeds under a galvanized barbed or woven wire fencing will generate heat enough to melt or blister the zinc galvanizing and will materially shorten the life of the fencing. If it seems necessary to burn the fence rows, it is advisable to take down the fencing, burn the trash, disk the fence row thoroughly, see that the corner posts are solid and well braced, then re-stretch the fence tightly.—American Agriculturist.

Alfalfa for Ewe Flock

Alfalfa hay is a wonderful help to the stockman in winter, not only because of its nutritive quality, but on account of the mineral content, which prevents what is commonly known as "calcium deficiency" in the ration. This is an important matter with the ewe flock. They may rob their bodies of lime in growing the lambs and, the first one knows, they are down and perhaps dead. Correction of such troubles before they even start is the point of importance. Alfalfa or good clover hay, and turnips or other suitable roots, are the best winter insurance for the flock.—Rural New Yorker.

Around the Farm

It pays to use good seed because it means larger yields of better quality crops.

Ewes should be fed liberally enough to bring them up to good condition before lambing time. Keeping down feed costs on a flock of ewes may be the most expensive way they can be handled.

Economists believe that properly cared for farm manure will save enough in fertilizer bills to pay the taxes. Store it in a concrete-lined pit with a roof over it and apply on the fields as soon as possible.

Winter activity of bees to generate heat in the hive makes them age too soon.

A farm business without records is like a clock without hands. You cannot tell whether it is gaining or losing nor even where it stands at any time.

Karakul sheep, valuable in the fur trade, might well be raised by more farmers in this country, particularly in the Southwest, says the United States bureau of animal industry.

"HOW JOHN SAVES MONEY . . . AND LIKES IT . . . !"

"IN hard times it's possible to make a husband save money. But it's hard to make him like it. I've found a way."

"John used to smoke at least a package of ready-made cigarettes a day. I suggested that he roll his own, when hard times came. He sneered at the idea."

"I bought a package of Target and made John try it. Now he says he won't smoke anything else, because Target is real cigarette tobacco, just like the ready-mades use. He says those forty gummed papers you get free with every package would make any dub a good cigarette roller."

"Well, John's happy, and I'm happy, and we save at least 50¢ a week."

AND GET THIS: The U. S. Government Tax on 20 cigarettes amounts to 6¢. On 20 cigarettes you roll from Target Tobacco the tax is just about 1¢. No wonder you get such value for a dime!

Brown & Williamson Tobacco Corp., Louisville, Kentucky ©1932

Simple Explanation

She—I wonder why we can't save anything?

He—The neighbors are always doing something we can't afford.

Young folks marry while old folks keep on talking about the rules that should govern marriage.

STOP RHEUMATIC PAINS WITH HEAT OF RED PEPPERS

Relieves Almost Instantly

Good old Nature has put into red peppers a marvelous therapeutic heat that gets right down to the source of trouble and almost instantly relieves the pains and aches of rheumatism, stiff joints, lumbago and neuritis. Thousands have found it the one safeguard against chest colds, too. Now this genuine red peppers' heat is contained in an ointment that you just rub on. In less than 3 minutes you feel relief come. It is called **Willow Red Pepper Rub**. Safe. Will not burn or sting. Get a small jar from your druggist.

A man may as well work at something as sit and idly think about most of the things he thinks about.

STOP THAT COLD

DISTRESSING cold in chest or throat—that so often leads to something serious—generally responds to good old Musterole with the first application. Should be more effective if used **once every hour for five hours.**

This famous blend of oil of mustard, camphor, menthol and other helpful ingredients brings relief naturally. Musterole gets action because it is a scientific "counter-irritant"—not just a salve—it penetrates and stimulates blood circulation, helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses.

To Mothers—Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

W. N. U., CHICAGO, NO. 14-1932

Make the Weather What You Want It

By ELMO SCOTT WATSON

ONE of the famous remarks attributed to that great American humorist, Mark Twain, which is familiar to most of his fellow-countrymen was to the effect that "Everybody talks about the weather but nobody ever does anything about it." However true that statement may have been once, it's passe now. For modern science and modern engineering have "done something about it," and now mankind can literally "make his own weather"—that is, the kind of weather he wants to have in his own home or place of business.

Of course, away back in the early history of mankind he learned how to make his habitation warm when it was too cold outside for comfort. In recent years our movie palaces have pointed the way to making their interiors comfortably cool when it's too hot outside for comfort. But up to now the average householder couldn't afford to follow the lead of the movie houses and install a "cooling system" as well as a "heating system" in his home.

So it is one of the triumphs of modern science and modern engineering that now anyone who has electricity at his command also has at his command perfect indoor weather for all climates and localities. And this is something more than regulation of heat and cold, for the new activity of science, described in the two words "air conditioning," means the correction of air to a point most desirable for personal comfort, with just the right amount of warmth or coolness, correct moisture content or relative humidity, removal of dust particles and forced circulation without draft.

Since it does include all those things, another favorite expression "It's not the heat; it's the humidity" is due to go by the boards. For it was that very thing, humidity, which started research engineers on the track that has brought about the development of air conditioning equipment which embodies the functions of heating, cooling, drying, moistening, cleansing and circulating of air. And the beauty of it is that the air conditioner, smaller than the average heat radiator, is so compactly built that it may be installed in any room, apartment, office, hospital, or place of business.

More than that the conditioners are so simple in operation and require so little supervision that two small switches on the end of the cabinet may be compared to the mythical lever which the cartoonists show the weather man operating when he wants to supply cold, heat, sultriness, dryness, rain, wind or calm. As a matter of fact the conditioner goes the weather man one better.

The conditioner can't guess wrong. It pulls in the air of a room, corrects it as it should be to provide personal comfort regardless of outdoor weather conditions, then sends it into the room so quietly occupants are unaware of the conditioner's operation. To give to indoor air that delicate touch of perfection, air conditioners should operate in rooms where the windows are kept closed so the correction of the room atmosphere isn't dissipated into the outdoors.

This factor brings up an interesting revelation of the general public's regard for fresh air. Fresh air isn't what it's cracked up to be, according to our foremost scientists. In many cases it may be more harmful than the average indoor air.

Air conditioners provide an answer to one

1.—With a raging blizzard, or a scorching sun raising havoc outdoors, the indoor weather in this room is cozy, comfortable and healthful. The air conditioner provides perfect air the year round, regardless of outdoor weather's eccentricities.

2.—No longer will the tired business man be tempted to run out on his office force and flee from the hot and sultry summer days. This air conditioner, installed in his office in place of the familiar radiator is the answer.

3.—Physicians, always alert to welcome any scientific or engineering achievement that will aid them in their work of relieving human suffering, hail air conditioning as a decidedly progressive step. No longer will patients be forced to undergo the added suffering brought on by hot and sultry weather, or by the injurious dry indoor air of the colder seasons. A air conditioner is shown here installed in a hospital room, so unobtrusive and compact it takes up little space even in the cramped quarters of the room.

4.—Turn on the heat, or turn on the cold! This air conditioning unit does both, and to complete its responsibility of supplying perfect indoor weather the year round, it keeps Old Man Humidity on the run in the hot and sultry seasons.

of the major demands and quests of mankind—comfort. In giving perfect indoor weather the year round, despite changing seasons and erratic activities of temperature and humidity they open the way for industrial and financial development of the tropics and the Orient, where white men swelter in misery under the depressing humidity, and laborers collapse from the effect of hard, manual activity coupled with heat and sultriness.

The farmer who spends every daylight hour in the summer in the sun-baked fields will have respite, and his wife, accustomed to a hard working existence among the pots, pans and cooking range in the kitchen, will blossom out a changed woman.

Business men who should wear their coats and keep their ties tied will be able to work as energetically and as smartly appearing in the summer as in winter, and their clerks and stenographers will have the alertness and desire to please that helps so much in retaining the patronage of old customers, and building up good will with new.

The answer to the brighter existence held out by aerologists to followers of almost every activity is based on the fact that despite the hottest temperatures and most depressing humidity of the working hours a man or woman can stand them day after day if they are able to sleep soundly in real comfort and repose, instead of fitfully and uncomfortably.

When air conditioning experts talk about homes and buildings with closed windows, a chorus of public thought sings out with these interjections: "What about carbon dioxide? How about headaches brought on by closed, stuffy rooms? How about that depressing feeling that overcomes us when we don't get enough fresh air? You forget what doctors say about fresh air."

The answer is on file in the public documents of the federal government in Washington. Privately many members of the medical profession have known for some years that factors other than a lack of so-called fresh air causes headaches and nausea in crowded places. But few have had the courage to be outspoken in the face of general belief and upset the belief imbedded in the public consciousness for so many years.

It is interesting to know how philosophers and scientists of centuries ago regarded air and how their findings stack up with modern scientific

developments. Aristotle, founder of a school of thought that swayed the thinking of mankind for more than 1,000 years, regarded air as one of nature's four cardinal elements, the others being fire, earth and water.

Up until 1757 little was known about air. Then, Dr. Joseph Black, who was experimenting with chemicals, made the discovery of a gas he called "fixed air," now known as carbon dioxide. In 1775, Joseph Priestley isolated oxygen, calling it "dephlogisticated air," and thus, for the first time mankind began to have some exact knowledge of atmosphere.

Lavoisier, a leading student of his period, a few years later discovered carbon dioxide would extinguish flame. He concluded, therefore, that an excess amount of carbon dioxide formed by breathing would contaminate indoor air. His standing and reputation brought ready acceptance for this theory, and it was but a natural step to the premise that fresh air, without excessive carbon dioxide and with an abundance of oxygen, was necessary for human well being.

A small number of scientists refused to concur in Lavoisier's theory but most scientists, engineers and medical men held their tongues in the belief nothing was to be gained by the voicing of contrary opinions.

Among the first public reports of these early theories is that of Dr. R. R. Sayers, surgeon of the United States public health service, and chief surgeon of the Department of Commerce's bureau of mines, a division that knows as much if not more about pure and impure air than any research organization in the world.

In reprint No. 1150 of the public reports, Doctor Sayers states: "It was observed by many investigators that it was not until the oxygen content of the respiratory air fell below 10 per cent that animals began to breathe with difficulty. Friedlander and Herter concluded from the results of their experiments that inhaling of 20 per cent carbon dioxide for several hours has no poisonous effect. Not until a mixture of gas containing 30 per cent or more of carbon dioxide was introduced did they find an appearance of depression. Leblanc pointed out that under conditions in which the carbon dioxide content of the air increases considerably, in lecture rooms, theaters, etc., the reduction of oxygen content is small and very seldom falls below 20 per cent, while the carbon dioxide content very seldom exceeds 1 per cent."

The same facts have been established by other investigators of standing since that time. W. Mehl, an engineer, in 1903 announced definitely the nonexistence of a "breath poison." He asserted the carbon dioxide content of a room is not a correct measure for the necessity of ventilation.

The scientific findings definitely established that it is the combination of heat and humidity that is so depressing and injurious to mental and physical alertness, and the consequent damage to business and industrial efficiency brought on by personal discomfort. With these facts, engineers working on conditioning of indoor air found that it is easy to be comfortable in a room in which the customary thermometer shows a temperature of 90 degrees, if the humidity is lowered.

Leading economists, engineers and builders have hailed air conditioning as the next big industry of the nation, an industry supplying a product that will take a place along with the telephone, automatic refrigeration and the automobile in general acceptance and necessity. They point out also that air conditioning is a new achievement that replaces practically nothing now in use, finds for itself a place in popular demand, and opens the way to increased manufacturing, sales and installation activity.

Scientists Fight Pests

With Natural Enemies

Entomologists, it is reported, are gradually changing their method of warfare against our insect foes. Instead of attempting to discover effective insecticides, they are now seeking methods of causing insects to war against each other. Fortunately the insect world is never really at peace at any time. The tremendous reproductive powers of this form of life are offset by the bugs, flies and birds which prey upon them.

The best way to keep the coddling moth under control, it has been found, is through a tiny wasp and likewise the mealy bug is best kept under control by its natural enemies.

Instead of searching for insecticides, therefore, the search is for the natural enemies of the pest it is desired to combat and these are then imported or increased by protection from their natural enemies in turn.

Oh, My!

Little Jimmie, four years old, is spending the winter with his mother and little brother Bobbie, in a small city in Florida. He is having trouble with the name of the big town, Miami, as to him the first syllable is a possessive, which he will not accept for himself. In response to the request, "Say Miami," he responds with "You-am-I." His mother hopes he will get the idea adjusted by the time the novelty wears off. —Indianapolis News.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.—Adv.

Geography Simplified

"What do they mean when they say Washington, D. C.?" asked the teacher.

"Washington, de capital," piped up a little chap.

How to breathe freely all night

Use this cream—keeps nostrils open—Catarrh goes away

Now you can breathe freely all day and sleep comfortably with mouth closed all night, no hacking, no choking, no fighting for breath. Just put a little ELY'S CREAM BALM up each nostril and you get instant relief that lasts for 10 hours. Head colds and Catarrhal troubles vanish. This fragrant antiseptic best because it penetrates and clears out every air passage in the head and soothes the inflamed or swollen mucous membrane. Try it. WORKS LIKE A CHARM! All drug-gists sell it.

Mothers!

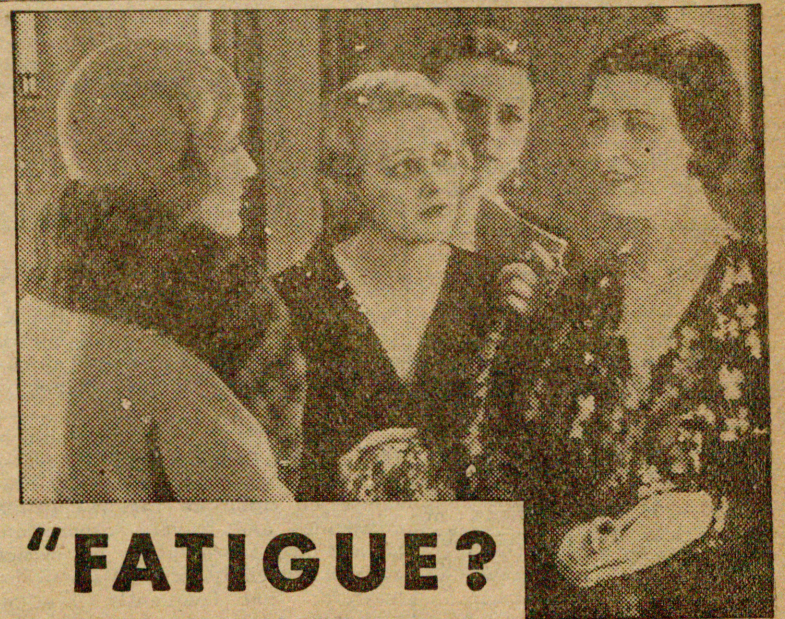

BEWARE OF

WORMS

Be on the look-out for the common enemy of children. Watch for such symptoms as picking at nostrils, gritting of teeth, poor appetite and frightening dreams. Expel these intestinal parasites with Comstock's Dead Shot Worm Pellets. Easy for the most sensitive child to take.

A man has to have much political influence to secure office; and why is it, that at the end of the term, he often hasn't any?

I just postpone it!"

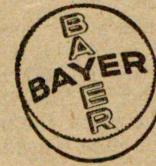

"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three o'clock, and certain days, of course, were worse than others.

"Then I learned to rely on Bayer Aspirin."

The sure cure for any headache is rest. But sometimes we must postpone it. That's when Bayer Aspirin saves the day. Two tablets, and the nagging pain is gone until you are home. And once you are comfortable, the pain seldom returns!

Keep Bayer Aspirin handy. Don't put it away, or put off taking it. Fighting a headache to finish the day may be heroic, but it is also a little foolish. So is sacrificing a night's sleep because you've an annoying cold, or irritated throat, or grumbling tooth, neuralgia, neuritis. These tablets always relieve. They don't depress the heart, and may be taken freely. That is medical opinion. It is a fact established by the last twenty years of medical practice.

The only caution to be observed is when you are buying aspirin. Bayer is genuine. Tablets with the Bayer cross are safe.

Hooked Bluejay

A bluejay was captured with fishing tackle at Ocala, Fla. F. A. Hansard was practicing casting with a hookless line in his own backyard when a jay jumped at the weighted

end and tangled itself up. There was much commotion before Hansard was able to release the bird.

We are all a great deal more nearly illiterate than we need to be.

Food for thought

Men and women find that those recurrent spring colds reduce their alertness of mind and body. To avoid such nuisances, doctors advise them to increase their bodies' store of Vitamin A. It is recognized that Scott's Emulsion of Cod Liver Oil contains a wealth of this valuable protective vitamin... as well as Vitamin D, so indispensable for sound bones and teeth. Children and adults find the emulsion an easy, pleasant way of taking cod liver oil. Scott & Bowne, Bloomfield, N. J. Sales Representative, Harold F. Ritchie & Co., Inc., New York.

To the Taxpayers:

Homer B. Grommon of Wheatland, candidate on the Republican ticket for nomination for the office of County Auditor is President of the Will County Taxpayers Association. In that capacity and in cooperation with the Board of Supervisors of Will County, he was instrumental in keeping the 1931 County tax rate at 69c, the same as the preceding year, which with a 15% cut on village valuations, and a 25% cut in farm valuations, meant lower taxes for all of us this year. He fought for these lower valuations successfully.

Mr. Grommon was asked by members of the Will County Taxpayers' Association to enter politics and endeavor to secure the nomination for the office of County Auditor, in order that the taxpayers of the County might have direct contact with the financial affairs of Will County, in further efforts to reduce taxes.

Mr. Grommon visited Mokena and Frankfort some time ago, assisting in the organization of the Frankfort Township unit of the Will County Taxpayers' Association, and is well liked from a personal standpoint, as well as from the standpoint of helping us with our tax rates.

Vote for HOMER B. GROMMON for COUNTY AUDITOR, April 12, 1932, Republican ticket.

Signed: Will County Taxpayers Association, Frankfort Township Unit, Per J. V. Hall.

ORLAND P. T. A.

good cheers for your spirit and some bits of experience helpful in the wise handling of children of this day, found in his years of service. We are happy to be able to present this chorus to the community, as they are known for their good work.

Hadley For
Attorney General

Charles W. Hadley, Republican candidate for Attorney General, in speeches in Chicago, stressed the importance of having the public always represented by skilled counsel in cases before the Illinois Commerce Commission.

"During my time as Chairman of the Illinois Commission," Mr. Hadley said: "the fact repeatedly was impressed upon me that the utility companies and private corporations always are represented by skilled counsel specially trained in utility matters; that frequently the respondents are represented by trained and experienced attorneys, but that too frequently there was no one to speak for the interests of the general public and that too frequently the Illinois Commerce Commission was forced to take the position of a prosecutor as well as the Judge. I feel that provision should be made to have the general public represented in proceedings before the Illinois Commerce Commission wherein the interests of the general public are involved, and it will be my purpose as Attorney General to assign a specially trained assistant to look after the interests of the general public under such conditions."

Mr. Hadley has made a fine record in his past capacity and his many friends feel he is the logical man for the important post of Attorney General and should be given the best of support at the polls next Tuesday, April 12.

MOKENA

Prof. and Mrs. McCleery attended the show, "Death Takes A Holiday" in the Play House in Chicago Wednesday evening.

Eddie Wachter made quite a hit at Hazelcrest, Saturday night when he played the Xylophone and sang at the Hazelcrest Firemen's dance.

CARD OF THANKS

I wish to express my heartfelt thanks to all relatives, friends and neighbors for their many acts of kindness and sympathy shown me in the illness and death of my father, Lawrence Schweser, also for the floral offerings and to those who so kindly donated the use of their automobiles; to Rev. Mr. Geffert for his comforting words.

Mrs. Henry Yunker and Family.

CARD OF THANKS

I wish to thank the voters of Frankfort township for coming out and giving me a vote. Being elected for my third term, I stand just where I stood eight years ago when elected to office.

I will try and get the balance of property owners out of the mud as soon as conditions permit me to do so.

EMIL D. CAPPEL
Highway Commissioner
Frankfort Township

Dated at Joliet this 28th day of March, A. D. 1932.

ALBION F. DELANDER,
County Clerk.
March 31-April 7.

Oak Lawn Lands In
1st Place In Tinley
Park Tournament

The biggest sporting event held in Tinley Park for some time was the basketball tournament which was held in the Tinley Park school auditorium Friday, Saturday, with the finals Sunday afternoon. The auditorium was packed at each game. At the Sunday finals Oak Lawn played Mokena, defeating the later. Tinley Park played Frankfort, defeating the later.

The result of the tournament is that Oak Lawn is placed in first place, Mokena second and Tinley Park third.

Roy Loebe to Sponsor
Two Demonstrations

Roy Loebe, head of the Orland Electric Shop is planning to hold a cold cooking demonstration on April 21st in Palos Park in the Palos Community church at 2:30 P. M. and at Orland Park in the evening at 8 P. M. The Orland place will be announced later. All the ladies of this and surrounding towns are invited and urged to attend.

Joliet Man Hurt
When Auto Hits
Tree Near Orland

Oliver Olson, 209 Sterling avenue Joliet, was seriously injured Saturday when his sedan skidded from the highway and crashed into a tree at Keane avenue north of 143rd st., northeast of Orland. Olson said that the accident occurred when he swerved to the left side of the road to avoid another automobile which failed to stop. The injured man was taken to the Silver Cross hospital in Joliet.

Re-nominate Wunder
For Circuit Clerk

Paul V. Wunder, the present Circuit Clerk of Will County has rendered capable, courteous and efficient service to the people of Will County and is personally known to many of us.

Mr. Wunder is seeking the nomination for his office on the Republican ticket at the primary election next Tuesday, April 12 and in view of his past excellent service he deserves the support of the voters of this section of Will County.

His office is run efficiently and without cost to the taxpayers. The reason for this is that the office of the Circuit Clerk is a fee office and the clerk's salary and that of his assistants are paid out of the fees they collect and the excess is turned into the county treasury.

Vote for Paul V. Wunder, April 12th.

Tinley P.T. A.

Elect Officers

Our regular meeting was held April 1st. Report was made that the \$25 for books had been accepted by Mrs. Sandige and each room will receive \$5 of this fund. The bunco and card party was discussed and the date set for May 6th at 8 o'clock. There will be good prizes, so be sure to come.

A novel stunt to increase attendance has been planned as follows: Each member asks friends to attend and write the names of all the persons asked. The night of the meeting the names are checked and the one whose list has the most invited present will receive a prize.

The following P.T. A. officers have been elected: Mrs. Josephine Bagby; 1st Vice President, Mrs. Betty Berg; 2nd Vice President, Helen Sandidge; Secretary, Mrs. Garster; Treasurer, Mrs. Ethel Wannemacher; Custodian, Mrs. Esther Andres.
